Occupational Health and Safety Act

CODE FOR THE DETERMINATION OF ASBESTOS FROM BULK SAMPLES

MINISTRY OF LABOUR
OCCUPATIONAL HEALTH AND SAFETY DIVISION

August 23, 1985

CODE FOR THE DETERMINATION
OF ASBESTOS FROM BULK SAMPLES

1. Principle of Method

- (1) Bulk samples, approximately 5 to 10 grams, are obtained from materials such as insulation, tiles or other materials suspected of containing asbestos.
- (2) Portions of the sample are examined under a petrographic microscope. Asbestos is identified by the fibrous morphology and optical properties and classified as being (1) chrysotile, (2) crocidolite, (3) amosite or (4) other amphibole asbestos. The latter includes tremolite, anthophyllite and actinolite.
- (3) A representative portion of the sample is analyzed by X-ray diffraction to help confirm the presence of serpentine and/or amphibole minerals when there is doubt as to the identity or classification of the sample.

2. Apparatus

- (1) Resealable plastic bags or containers to hold the samples.
- (2) X-ray diffraction equipment.
- (3) Sample holders for X-ray equipment.
- (4) Mortar and pestle.
- (5) A pair of tweezers with fine-pointed tips.
- (6) A petrographic microscope capable of magnifications up to 450 times and equipped with polarizer, analyzer, gypsum compensator and accessories for dispersion staining.
- (7) Glass microscope slides.
- (8) Glass coverslips for microscope slides.

3. Reagents

- (1) Immersion oils, such as Cargille oils, with refractive indices ranging from 1.52 to 1.70.

4. Procedure

- (1) The bulk sample is examined and representative portions are taken by means of tweezers.
- (2) If necessary, a portion of sample is crushed using the mortar and pestle.
- (3) All sample preparation should be conducted inside a fumehood.
- (4) X-Ray Diffraction Analysis
 - (a) The sample is mounted in the sample holder and analyzed using X-ray diffraction by scanning over the 2-theta range of approximately 9° to 40° if a cobalt X-ray source is used.
 - (b) The d-spacings of the peaks present are calculated and compared to those listed in Table 1 which have been published by the Joint Committee On Powder Diffraction Standards (Selected Powder Diffraction Data for Minerals, 1st Ed., 1974).
- (5) Microscopic Analysis
 - (a) Using tweezers, a portion of the sample is placed in an appropriate immersion oil on a glass microscope slide and covered with a coverslip.
 - (b) Using magnifications from approximately 60X to 450X the sample is examined for the appropriate optical properties listed in Table 1.

- (c) The microscopic examination* is repeated as necessary to estimate the amount of asbestos present in the bulk sample.

5. Calculations

- (1) The Occupational Health Laboratory uses an X-ray tube with a cobalt target. The d-spacings of the X-ray peaks are calculated from the 2-theta angle using the following equation:

$$\text{d-spacing in } \text{\AA} = \frac{1.7889}{2 \sin \left(\frac{2\text{-theta}}{2} \right)}$$

This equation will differ if another X-ray source (i.e., not cobalt) is used.

6. Range and Sensitivity

- (1) Fibres less than about 5 μm long and less than about 0.5 μm wide cannot be identified since they are smaller than the resolution of the light microscope.
- (2) Asbestos fibres in concentrations of less than about 5% may not be detected by means of the X-ray diffraction analysis.
- (3) Asbestos fibres in concentrations of less than approximately 0.5% may not be detected by means of light microscopic examination.

7. Presentation of Results

- (1) The following forms of asbestos are identified and reported individually: chrysotile, amosite, crocidolite, amphibole asbestos (excluding crocidolite and amosite).

- (2) The amount of asbestos, by volume, is estimated by the area it occupies relative to that occupied by all the particulate matter on the microscope slide and is reported as one of the following:

- (a) none detected (detection limit 0.5%)
- (b) less than 1%
- (c) 1% to 5%
- (d) 5% to 25%
- (e) 25% to 50%
- (f) 50% to 75%
- (g) more than 75%

8. Interferences

- (1) Minerals of the serpentine and amphibole groups exhibit the same X-ray diffraction patterns as chrysotile and amphibole asbestos, respectively. Therefore, mineral fibres exhibiting the appropriate properties as listed in Table 1 must be found before asbestos can be confirmed as being in the sample.
- (2) Cellulose fibres and carbonates, if present in large quantities, may interfere with the analysis. The cellulose can be removed by ashing in a furnace at approximately 400°C for one hour. The carbonates can be removed by treatment with dilute hydrochloric acid.

* If the fibres are small such that their optical properties cannot be determined, a portion of the sample is then processed for electron microscopic examination combined with X-ray energy dispersive analysis to determine the presence of asbestos.

ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 664/85.

Exemption—Ontario Hydro—OH-30/2.

Made—December 5th, 1985.

Filed—December 18th, 1985.

ORDER MADE UNDER THE
ENVIRONMENTAL ASSESSMENT ACTEXEMPTION—ONTARIO HYDRO—
OH-30/2

Having received a request from Ontario Hydro that an undertaking, namely:

the activity of planning, design and construction of, and property acquisition for, shoreline and riverbank improvements and the subsequent use and maintenance of these improvements;

be exempt from the application of the Act pursuant to section 29; and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

A. The public will be interfered with and damaged by the delay in correction of erosion or sedimentation problems which could result in additional loss or damage to public and private properties.

B. Ontario Hydro will be interfered with and damaged by the delay and expense required to prepare individual environmental assessments which could render the shoreline and riverbank improvements uneconomical and result in a less appropriate course of action and in increased costs to Ontario Hydro through damage to facilities and settlement of damage claims of private property owners.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

A. Ontario Hydro has formally submitted a Class Environmental Assessment pursuant to the previous exemption order for this undertaking; however, an approval has not yet been issued with respect to that Class Environmental Assessment. This exemption extends the existing exemption, which would otherwise expire on January 1, 1986, to provide time to complete processing the Class Environmental Assessment.

B. The undertaking is not likely to have any significant adverse effects on the environment and therefore the interference with the activity of shoreline and riverbank improve-

ments which would be caused by the immediate application of the Act would be undue.

- C. Parts of the undertaking are subject to review and approval under various acts or agreements, including the *Lakes and Rivers Improvement Act*, the *Ontario Water Resources Act* and any existing Water Power Lease Agreements with the Ministry of Natural Resources.
- D. Parts of the undertaking are proposed to repair erosion problems which would become progressively worse if not quickly repaired and the delay involved in obtaining approval under the *Environmental Assessment Act* could result in increased erosion or sedimentation, degradation of the environment and danger to buildings and property.

This exemption is subject to the following terms and conditions:

1. This exemption shall terminate on December 31, 1986 or, if earlier, the date on which approval to proceed with the undertaking is received under the Act.
2. Ontario Hydro shall consult with the Director of the Environmental Assessment Branch in cases where it appears that the activity would result in significant adverse environmental changes so that Ontario Hydro and the Minister of the Environment may decide whether the project should proceed pursuant to an individual environmental assessment rather than this order.
3. An Environmental Report shall be prepared by Ontario Hydro for each project initiated under this exemption order, and will be submitted to the Director of the EA Branch at least 30 days prior to the proposed implementation of such activities. A copy of the Environmental Report shall also be submitted to the Director of the appropriate Ministry of the Environment regional office. This report will be filed in the public record in order to inform the public of proposed projects.
4. Where any activity which otherwise would be exempt under this order is being carried out as, or is part of, an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed as well as the conditions of this order.
5. Where any activity which is the subject of this order is being carried out as, or is part of, another undertaking which is the subject of

an exemption order under the Act, the activity exempt under this order shall be carried out in accordance with any terms or conditions in the other exemption order as well as the conditions in this order.

6. Ontario Hydro shall continue to provide the Director of the Environmental Assessment Branch with a list of projects, which Ontario Hydro proposes to carry out under this order, every six months and shall not carry out any project pursuant to this order unless it is included on the list or added as an update.

EXEMPTION—ONTARIO HYDRO— OH-29/2

Having received a request from Ontario Hydro that an undertaking, namely:

the activity of modifying by redeveloping or upgrading all existing hydroelectric facilities including: hydroelectric generating stations, storage/control dams, measuring/submerged weirs, and access roads;

be exempt from the application of the Act pursuant to section 29; and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

- A. The public will be interfered with and damaged by the delay in correction of facility defects or delay in optimization of resource use which could either render a facility unsafe (with possible resultant loss or damage to public property or health) or uneconomical.
- B. Ontario Hydro will be interfered with and damaged by the delay and expense required to prepare individual environmental assessments which could render modification

activities uneconomical, necessitate extended uneconomic operation of facilities or temporary decommissioning of facilities leading to a requirement for substitute power.

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

- A. Ontario Hydro has formally submitted a Class Environmental Assessment pursuant to the previous exemption order for this undertaking; however, an approval has not yet been issued with respect to that Class Environmental Assessment. This exemption extends the existing exemption, which would otherwise expire on January 1, 1986, to provide time to complete processing the Class Environmental Assessment.
- B. The undertaking is not likely to have any significant adverse effects on the environment as the exempt activities are primarily of a minor nature; therefore, the interference which would be caused by the immediate application of the Act, would be undue.
- C. Parts of the undertaking are subject to review and approval under various acts or agreements, including the *Environmental Protection Act*, Water Power Lease Agreements with the Ministry of Natural Resources and Licences of Occupation with MNR.

This exemption is subject to the following terms and conditions:

1. This exemption shall terminate on December 31, 1986 or, if earlier, the date on which approval to proceed with the undertaking is received under the Act.
2. Ontario Hydro shall consult with the Director of the Environmental Assessment Branch in cases where it appears that the modification activity would result in significant adverse environmental changes so that Ontario Hydro and the Minister of the Environment may decide whether the project should proceed pursuant to an individual environmental assessment rather than this order.
3. An Environmental Report shall be prepared by Ontario Hydro for each project initiated under this exemption order, and will be sub-

mitted to the Director of the EA Branch at least 30 days prior to the proposed implementation of such activities. A copy of the Environmental Report shall also be submitted to the Director of the appropriate Ministry of the Environment regional office. This report will be filed in the public record in order to inform the public of proposed projects.

4. Where any activity which otherwise would be exempt under this order is being carried out as, or is part of, an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed as well as the conditions of this order.
5. Where any activity which is the subject of this order is being carried out as, or is part of, another undertaking which is the subject of an exemption order under the Act, the activity exempt under this order shall be carried out in accordance with any terms or conditions in the other exemption order as well as the conditions in this order.
6. Ontario Hydro shall continue to provide the Director of the Environmental Assessment Branch with a list of projects, which Ontario Hydro proposes to carry out under this order, every six months and shall not carry out any project pursuant to this order unless it is included on the list or added as an update. O. Reg. 665/85.

Occupational Health and Safety Act

January 18, 1986

MINISTRY OF LABOUR

NOTICE OF PROPOSED REGULATION RESPECTING CHROMIUM

Notice is hereby given of the following proposed regulation relating to the designation of chromium under section 22(a) of the Occupational Health and Safety Act, R.S.O. 1980, c. 321 (the Act).

The government is committed to an open and consultative process for the development of designated substance regulations on the basis that this is more likely to result in quality regulations which are more understandable and acceptable to the affected parties. In order to ensure the most expeditious development of this regulation, dates have been specified in the next paragraph when certain steps in the process are expected to take place. These dates will be adhered to.

All comments that are received in response to this notice will be analyzed and any proposed amendments arising from these comments will be presented at a public meeting to take place not later than September, 1986 for review and further comment. The comments will be analyzed and the regulation may be further revised. It is intended that the regulation will be transmitted to the Advisory Council on Occupational Health and Occupational Safety not later than December, 1986.

The Ministry welcomes comments on all aspects of the proposed regulation. It wishes to receive information and comments on three particular issues.

First, since chromium in one or more forms can be found in welding fumes, and since the Ministry has published a notice of possible designation for welding fumes and gases, would worker exposure to chromium during welding be more effectively controlled under the proposed chromium regulation or under a future welding fumes and gases regulation?

Second, is there justification to exempt underground mines from the proposed regulation based on health effects information and worker exposure data?

Third, the Ministry is considering alternate approaches to medical surveillance requirements in designated substance regulations. The Ministry is especially interested in receiving comments on three possible approaches. The Ministry has received advice from the Advisory Council on Occupational Health and Occupational Safety on the criteria for determining

whether medical surveillance should be mandatory or voluntary. In light of this advice the Ministry has considered the likely benefits to accrue from a medical surveillance program for chromium. This proposed regulation provides that if a worker, a worker's physician, or an employer believes that the worker's health may have been affected by inhalation, ingestion, absorption of, or contact with chromium, the worker must undergo a medical examination and clinical tests to determine whether the worker should be removed from chromium exposure. This provision would not entail a medical surveillance program for all workers.

The Ministry has not adopted an inflexible position on this proposal and welcomes comments on it in light of two other options. The first is mandatory medical surveillance for all workers. The other approach would provide for a mandatory medical surveillance program with the proviso that a worker could upon written notice to the employer withdraw from such a program.

The Special Studies and Services Branch of the Ministry has prepared a summary of the health effects attributable to exposure to chromium which includes the recommendations for the exposure limits based upon the health effects information. A copy of this document may be obtained by contacting Dr. Donna Brown at the number below.

Additional background information is available for review during business hours in the Ministry of Labour Library at 400 University Avenue, 10th floor, Toronto, Ontario, and district offices of the Ministry. If these hours are not convenient, please contact Dr. Donna Brown at the number below.

Comments on the proposed regulation or any particular sections therein must be submitted by April 18, 1986 to:

Designated Substances Project
Program Development Unit
Ministry of Labour, 9th Floor
400 University Avenue
Toronto, Ontario
M7A 1T7

Comments received will be made available for public examination after the close of the public comment period.

MINISTRY OF LABOUR
OCCUPATIONAL HEALTH AND SAFETY DIVISION

January 18, 1986

PROPOSED REGULATION MADE UNDER THE
OCCUPATIONAL HEALTH AND SAFETY ACT

DESIGNATED SUBSTANCE - CHROMIUM

1. In this Regulation,
 - (a) "chromium" means elemental chromium and inorganic chromium compounds in the following classes:
 - (i) Class 1 chromium consisting of chromium metal, chromium metal alloys, divalent and trivalent chromium compounds,
 - (ii) Class 2 chromium consisting of the following hexavalent chromium compounds, namely, zinc chromate, calcium chromate, lead chromate, barium chromate, strontium chromate and sintered chromium trioxide,
 - (iii) Class 3 chromium consisting of all other hexavalent chromium compounds not listed in Class 2;
 - (b) "control program" means a chromium control program required by this Regulation;
 - (c) "joint health and safety committee" includes a joint health and safety committee established under section 8 of the Act, or a committee of like nature or an arrangement, program or system in which the workers participate that conforms to subsection 8(2) of the Act;
 - (d) "m³" means cubic metre;
 - (e) "mg" means milligrams.
2. Chromium is prescribed as a designated substance.
3. (1) Subject to subsection (3), this Regulation applies to every employer and worker at a work place where chromium is produced, processed, used, handled or stored and at which a worker is likely to inhale, ingest, absorb or come into contact with chromium.

(2) Subject to subsection (3), an employer to whom this Regulation applies shall take every precaution reasonable in the circumstances to ensure that every worker who is not an employee of the employer but who is working in the work place of the employer and is exposed to chromium and whose health is likely to be affected thereby is protected and the worker shall comply with the requirements of the employer.

(3) Subsections (1) and (2) and sections 4 to 17 of this Regulation do not apply to,
 - (a) an employer or to the workers of an employer who primarily carries on the business of construction; or
 - (b) an employer or to the workers of an employer where exposure to chromium results only from the presence, use, handling or storage of a finished article or thing containing chromium.
4. (1) Every employer shall take all necessary measures and procedures by means of engineering controls, work practices and hygiene practices and facilities to ensure that the time-weighted average exposure of a worker to airborne chromium shall not exceed,

(a) in the case of Class 1 chromium, 0.50 mg chromium per m³ of air;

(b) in the case of Class 2 chromium, 0.02 mg hexavalent chromium per m³ of air; and

(c) in the case of Class 3 chromium, 0.02 mg hexavalent chromium per m³ of air.

(2) Notwithstanding subsection (1), an employer shall ensure that the time-weighted average exposure of a worker to Class 2 chromium is reduced to the lowest practical level.

(3) Notwithstanding subsection (1), an employer shall ensure that the exposure of a worker to Class 3 chromium shall not exceed a short-term exposure concentration, measured over 15 minutes, of 0.05 mg hexavalent chromium per m³ of air.

(4) Subject to section 5, every employer shall comply with subsections (1), (2) and (3) without requiring a worker to wear and use respiratory equipment.

(5) The time-weighted average exposure of a worker to airborne chromium shall be calculated in accordance with the Schedule and the result of the calculation of the exposure may be certified by an inspector.

(6) Every worker shall work in compliance with the work practices and hygiene practices in accordance with the provisions of the control program.

(7) On a prosecution for a failure to comply with subsection (1), (2) or (3), it shall be a defence for an employer to prove that the employer has complied with subsection (1), (2) or (3) and that a breach of subsection (1), (2) or (3) occurred solely because a worker failed to work in compliance with the work practices and hygiene practices in accordance with the provisions of the control program and the employer has taken

every precaution reasonable in the circumstances to require the worker to do so.

5. (1) Where the strict duty imposed by subsection 4(1), (2) or (3) cannot be complied with because,

(a) an emergency exists; or

(b) the measures and procedures necessary to control the exposure of a worker to airborne chromium,

(i) do not exist or are not available,

(ii) are not reasonable or practical for the length of time or frequency of exposure or the nature of the process, operation or work, or

(iii) are not effective because of a temporary breakdown of equipment,

the employer shall provide a worker with respiratory equipment which shall be used by the worker.

(2) Where a worker is exposed to airborne chromium, the worker may request a respirator regardless of the level of exposure and the employer shall provide it.

(3) Where respiratory equipment is provided by an employer and used by a worker, the respiratory equipment,

(a) shall be appropriate in the circumstances for the concentration of airborne chromium;

(b) shall meet or exceed the requirements set out in the Code for Respiratory Equipment for Chromium dated the 30th day of October, 1985, and issued by the Ministry; and

(c) shall be used in accordance with the requirements of the Code.

(4) The employer shall provide training and instruction to a worker in the proper care and use of respiratory equipment provided by the employer.

6. (1) Every employer to whom this Regulation applies shall cause an assessment to be made in writing of the exposure or likelihood of exposure in a work place of a worker to the inhalation, ingestion, absorption or contact with chromium.

(2) In causing the assessment to be made, the employer shall consider and take into account such matters as,

(a) the methods and procedures used or to be used in the production, processing, use, handling or storage of chromium;

(b) the extent and potential extent of the exposure of a worker to the inhalation, ingestion, absorption or contact with chromium; and

(c) the measures and procedures necessary to control such exposure by means of engineering controls, work practices and hygiene practices and facilities.

(3) In causing the assessment to be made, the employer shall consult thereon with the joint health and safety committee and the committee may make recommendations with respect to the assessment.

(4) A copy of the assessment made by an employer shall be given by the employer to each member of the joint health and safety committee.

7. (1) Where the assessment discloses or would disclose, if made in conformity with section 6, that a worker is likely to inhale, ingest,

absorb or come into contact with chromium and that the health of the worker may be affected thereby, the employer shall develop, establish, put into effect and maintain measures and procedures to control the exposure of the worker to chromium and shall incorporate the same into a chromium control program.

(2) The control program shall include provisions for,

(a) engineering controls, work practices and hygiene practices and facilities to control the exposure of a worker to chromium;

(b) methods and procedures to monitor the concentrations of airborne chromium in the work place and the exposure of a worker thereto;

(c) personal records of the exposure of a worker to chromium at the work place, including the time-weighted average exposure of the worker and of the concentrations of chromium and the times in which such concentrations were taken to be representative of the exposure of the worker and used in calculating the average exposure, to be maintained by the employer;

(d) a training program for supervisors and workers on the health effects of chromium and the measures and procedures required under the control program.

(3) The control program may include provisions for a medical surveillance program.

(4) In developing the measures and procedures mentioned in subsection (1) and the control program, the employer shall consult with the joint health and safety committee and the committee may make recommendations with respect to the same.

8. (1) Where engineering controls come into existence through the development of knowledge and technology and would, if adopted and implemented by an employer, reduce the exposure of a worker to or below the time-weighted average exposure limit prescribed by this Regulation, the employer shall adopt and implement the engineering controls where it is reasonable or practical to do so.
- (2) Where a change is made in a process involving chromium or in the methods and procedures in the use, handling or storage of chromium and the change could result in a significant difference in the exposure of a worker to the inhalation, ingestion, absorption or contact with chromium, the employer shall cause a further assessment to be made forthwith and the provisions of sections 6 and 7 apply to the further assessment.
9. (1) Where disputes arise between an employer and a joint health and safety committee as to an assessment required under section 6 or 8 or as to the measures and procedures mentioned in subsection 7(1) or the control program or its provisions required under section 7 or 8, the employer, a member of the joint health and safety committee or the committee may notify an inspector thereof who shall investigate and give a decision in writing to the employer and to the member or the committee.
- (2) Nothing in subsection (1) applies so as to affect the power of an inspector to issue an order for a contravention of this Regulation.
10. (1) A copy of the control program put into effect by the employer shall be given by the employer to each member of the joint health and safety committee and the employer shall acquaint every worker affected by the control program with its provisions.
- (2) A copy of the control program put into effect by the employer shall be made available by the employer in English and in the majority language of the work place.
11. Subject to section 17, the procedures for monitoring, sampling and determining the concentrations of airborne chromium in the atmosphere of a work place and the exposure of a worker thereto shall be those set out in the Code for Measuring Airborne Chromium dated the 30th day of October, 1985, and issued by the Ministry.
12. The results of monitoring the concentrations of airborne chromium in the work place and the exposure of a worker thereto as provided by the control program shall be,
- (a) posted forthwith by the employer, as soon as the results are available, in a conspicuous place or places at the work place where they are most likely to come to the attention of the workers affected thereby, and the employer shall keep the results posted for a period of at least fourteen days;
 - (b) furnished to the joint health and safety committee; and
 - (c) kept by the employer for a period of at least five years.
13. (1) The records of the exposures of each worker to airborne chromium at the work place to be maintained as provided by the control program shall identify the worker, including the worker's date of birth, the worker's jobs or occupations at the work place, the results of monitoring for exposure to airborne chromium in the worker's work area and the use by the worker of respiratory equipment and its type.
- (2) Except where the control program includes provisions for medical surveillance the records maintained by the employer under subsection (1) shall be kept in a secure place by the employer or, where the employer is no longer able to keep the records, the records shall be forwarded to the Director, Occupational Health Branch of the Ministry to be kept for,

- (a) a period of forty years from the time such records were first made; or
- (b) a period of twenty years from the time the last of such records were made,

whichever is the longer.

14. (1) Where, as a result of exposure to chromium,

- (a) a worker or the worker's physician has reason to believe that the worker's health has been affected by the inhalation, ingestion, absorption of or contact with chromium; or
- (b) the employer believes that a worker has inhaled, ingested, absorbed or come into contact with chromium, and the worker's health is likely to be affected thereby,

the worker shall, at the expense of the employer, undergo a medical examination and clinical tests to determine whether the worker is fit, fit with limitations or unfit to work in chromium exposure.

(2) The physician examining the worker shall be entitled to be provided with a copy of the records of the exposure of the worker to airborne chromium.

15. (1) Where the control program includes provisions for a medical surveillance program, a physician conducting the medical examination or clinical tests, or under whose supervision the examination or tests are made shall provide a report of the medical examination and clinical tests of a worker with the interpretation to be placed thereon,

- (a) to the worker;
- (b) to the worker's personal physician, if any, upon the request in writing of the worker; and

- (c) in the case of a deceased worker, to the next of kin or personal representative of the worker, upon the request in writing of such next of kin or personal representative,

and any authorization of another person by the worker or the worker's next of kin or personal representative is of no effect.

(2) The employer shall provide a copy of the records of the exposures of the worker to airborne chromium as provided by the control program to the physician who examines the worker and under whose supervision the clinical tests of the worker are performed.

(3) The records of medical examinations and clinical tests of a worker obtained and made under the control program and of the exposures of the worker to airborne chromium furnished by the employer under subsection (2) shall be kept in a secure place by the physician who has conducted the examinations and tests or under whose supervision the examinations and tests have been made for,

- (a) a period of forty years from the time such records were first made; or
- (b) a period of twenty years from the time the last of such records were made,

whichever is the longer.

(4) Where the physician is no longer able or willing to keep the records, the records shall be forwarded to the Chief Physician, Occupational Health Medical Service of the Ministry, or a physician designated by the Chief Physician and the provisions of subsection (3) shall, with necessary modifications, apply thereto.

16. (1) The physician conducting the physical examination or clinical tests under sections 14 and 15 shall advise the employer, who shall act thereon, and the worker whether the worker is fit or, because of a condition resulting from exposure to chromium, is fit with limitations or unfit for work in chromium exposure without giving or disclosing to the employer the records or results of the examination or tests.

(2) Where a worker is removed from chromium exposure because the physical examination or clinical test discloses that the worker may have or has a condition resulting from exposure to chromium and suffers a loss of earnings occasioned thereby, the worker is entitled to compensation for the loss in the manner and to the extent provided by the Workers' Compensation Act.

(3) Upon advising the employer and the worker that a worker, because of a condition resulting from exposure to chromium, is fit with limitations or unfit for work in chromium exposure, the physician shall advise in writing upon a confidential basis the joint health and safety committee thereof and in giving such advice shall indicate his or her opinion as to the interpretation to be placed thereon.

(4) Where the physician advises the employer that a worker, because of a condition resulting from exposure to chromium, is fit with limitations or is unfit for work in chromium exposure, the physician shall forthwith communicate such advice to the Chief Physician, Occupational Health Medical Service of the Ministry.

17. For the purposes of this Regulation, the methods and procedures that may be used or adopted may vary from the Codes issued by the Ministry if the protection afforded thereby or the factors of accuracy and precision used or adopted are equal to or exceed the protection or the factors of accuracy and precision in the Codes issued by the Ministry.

18. (1) This Regulation, except sections 4, 5, 7, 8 and 10 to 17 comes into force on the day this Regulation is filed with the Registrar of Regulations.

(2) Sections 4, 5, 7, 8 and 10 to 17 come into force ninety days after the day this Regulation is filed with the Registrar of Regulations.

SCHEDULE

The time-weighted average exposure of a worker to airborne chromium shall be calculated as follows:

1. The average concentrations of chromium to which a worker is exposed shall be determined from analyses of air samples taken as being representative of the exposure of the worker to chromium during work operations as set out in the Code mentioned in section 11.
2. The results of the analyses are the concentrations of chromium or hexavalent chromium expressed as milligrams chromium per m³ of air.
3. The concentrations shall be multiplied by the time in hours to which the worker is taken to be exposed to such concentrations.
4. The daily exposure shall be calculated as follows:

$C_1T_1 + C_2T_2 + \dots + C_nT_n = \text{cumulative daily exposure, where } C_1 \text{ is the concentration found in an air sample and } T_1 \text{ is the total time in hours to which the worker is taken to be exposed to concentration } C_1 \text{ in a day.}$

5. The daily time-weighted average exposure shall be calculated by dividing the cumulative daily exposure by 8.
6. The weekly exposure shall be calculated as follows:

$C_1T_1 + C_2T_2 + \dots + C_nT_n = \text{cumulative weekly exposure, where } C_1 \text{ is the concentration found in an air sample and } T_1 \text{ is the total time in hours to which the worker is taken to be exposed to concentration } C_1 \text{ in a week.}$

7. The weekly time-weighted average exposure shall be calculated by dividing the cumulative weekly exposure by 40.

AIR SAMPLING METHOD FOR
TOTAL CHROMIUM AND ITS COMPOUNDS

1. Principle of the Sampling Method

Air, possibly containing chromium and/or its compounds, is drawn at a specified fixed flow rate for a known duration through a mixed cellulose ester filter of specified pore size and diameter held in a worker's breathing zone by a plastic closed-face filter holder. The particulate matter collected on the sample filter is then analyzed in a laboratory for the total quantity of chromium present. In addition to personal sampling, area samples may be collected by this method by placing a sampling train on a suitable support at a strategically selected location with the inlet port facing downward.

2. Equipment

The sampling train used to obtain an air sample of chromium particulate is to include the following components, and satisfy the criteria suggested:

(1) A battery operated portable pump which:

- (a) is capable of delivering, for 6-8 hours, not less than 2 litres of air per minute with a filter in the sampling train. The maximum deviation from the prescribed flow rate is not to exceed $\pm 5\%$ and it is suggested that the pump be equipped with a pulsation damper;
- (b) is intrinsically safe, i.e., certified by an accepted agency as safe for use in potentially explosive atmospheres;
- (c) includes a calibrated flow meter or a mechanism for maintaining a constant flow rate;

(d) has an on-off switch and flow rate control or adjustment mechanism which are as tamper-proof as possible.

(2) Mixed cellulose ester filters of appropriate size, preferably 37 millimetres (mm) in diameter, 0.8 micrometres in pore size.

(3) Filter support pads of the same size as the mixed cellulose ester filters used, preferably 37 mm in diameter.

(4) A closed-face filter holder of the same size as the mixed cellulose ester filters and the filter support pads used, preferably 37 mm in inner diameter and with an adapter which provides a leak-proof fit for connecting flexible tubing.

(5) A sufficient length of flexible tubing with appropriate wall thickness to prevent its collapsing when air is drawn through and with appropriate inner diameter which will provide a leak-proof connection to the filter holder adapter and to the inlet port adapter of the portable pump.

(6) A thermometer, accurate to $\pm 1^{\circ}\text{C}$, for ambient air temperature measurement if required.

(7) A barometer, accurate to ± 5 mm Hg (0.67 kPa), for measuring atmospheric pressure if required.

3. Sampling Procedure

(1) Preparation of Pumps

(a) The pump battery pack shall be fully charged according to the manufacturer's instructions, before

use. After a pump with a fully charged battery pack has been operated for a duration as recommended by the manufacturer, another fully charged battery pack shall be substituted for the used one if continued operation of the same pump in the same day is intended.

- (b) Flow meters, or constant flow devices on the pumps shall be calibrated at 2.0 litres per minute with the filter/filter holder assembly in line by using a primary standard, such as a bubble meter, and the recommended procedure in the manufacturer's instructions for using such primary standard apparatus, after:

- (i) not more than 40 hours of operation;
- (ii) receiving unusually harsh or potentially damaging treatment;
- (iii) being disassembled for maintenance.

(2) Preparation of Filter Holders

- (a) Assemble the filter holders in a clean environment prior to initiation of sampling.
- (b) Each filter holder shall be prepared by the following procedure:
 - (i) use only a clean filter holder and handle the filter support pad and filter with tweezers. Place a filter support pad and a mixed cellulose ester filter in the base of a filter holder;
 - (ii) plug the inlet and outlet ports;

- (iii) ensure that the joints of the filter holder are sealed with non-porous, shrinkable cellulose band or tape.

(3) Sampling

- (a) Assemble the sampling train by fixing one end of the flexible tubing to the inlet port of the pump and the other end with the adapter to the outlet port of the filter holder.
- (b) Check for air leaks in the sampling train by turning on the pump and inserting a clean plastic plug into the inlet port of the filter holder. The air flow indicator on a pump with a flow meter should drop to the zero flow position and oscillate slightly. If this does not occur, find and either repair the leak if possible, or replace the faulty component.
- (c) Label the filter holder with an appropriate sample number.
- (d) Attach the pump preferably to the worker's belt or place it in a pocket; place the flexible tubing over the shoulder and clip the filter holder to the clothing as near as possible to the breathing zone, with the inlet port facing downward. Ensure that the sampling train does not interfere with the worker's movements.
- (e) Check again that the sampling train is properly assembled, remove the plastic plug from the filter holder's inlet port and switch on the pump. Allow the flow rate to stabilize for a short duration then adjust the rate to the pre-calibrated mark of 2.0 litres per minute, if the pump has a flow meter. Pumps with con-

stant flow devices shall not be reset after the flow rate control mechanism has been calibrated to deliver air at this rate. A calibrated external flow meter may be used to check the air flow rate.

- (f) Note the following information for each sample:

- (i) date of sampling;
- (ii) company name;
- (iii) model and serial number of the sampling pump;
- (iv) calibration date of the sampling pump;
- (v) name of worker;
- (vi) job title;
- (vii) work or operation performed;
- (viii) filter holder or sample number;
- (ix) air flow rate;
- (x) time of initiation of sampling.

- (g) Ensure that for any sampling performed during any survey, two control or blank filters are prepared in the same manner as the sample filters. These blank filters shall remain in sealed filter holders during the survey (i.e. no air is to be drawn through these filters).

- (h) Sampling shall be carried out for a full workshift or operation during which the worker is exposed to chromium. Sequential air samples may be taken as opposed to single air samples during a workshift or operation. Where it is necessary to obtain a better estimate of the worker's time-weighted average exposure, air sampling should be conducted for a sufficient number of workshifts or days in a work week.

- (i) During the sampling interval, the sampling train shall be checked periodically to ensure that it is functioning properly. The air flow

rate shall not be readjusted after the initial flow rate is set. If the flow rate changes significantly, terminate sampling and take another sample.

- (j) The ambient air temperature and pressure in the sampling area, if required, shall be recorded at least once.

- (k) To terminate sampling, perform the following sequence of steps:

- (i) check the air flow rate just prior to termination of air sampling;

- (ii) record the time of termination of sampling;

- (iii) switch off the pump and carefully remove the sampling train from the worker;

- (iv) remove the filter holder and insert clean plastic plugs into the inlet and outlet ports;

- (v) ship the filter and filter holder together to a laboratory and request analysis of the filter for total chromium.

- (4) A sufficient number of area samples should be taken at selected work locations where necessary.

4. Calculation of Results

- (1) Corrections for the field blank are made for each sample provided that the various amounts of total chromium in all sample filters are greater than the amount of total chromium in each field blank filter.

- (2) The concentration of total chromium in an air sample is calculated by using the following equation:

$$C = \frac{A}{F \times t}$$

Where C = concentration of total chromium in mg/m³;

A = corrected amount of total chromium on the sample filter in µg;

F = air flow rate in litres per minute; and

t = sampling duration in minutes.

5. Limitation

This method does not differentiate between hexavalent chromium and other forms. An alternative sampling method involving colorimetric assay shall be used for determining the concentrations of total hexavalent chromium compounds in air.

THE DETERMINATION OF TOTAL CHROMIUM (Cr)
ON AIR SAMPLING FILTERS

1. Principle of the Method

- (1) Air is drawn at a fixed rate for a known duration through a cellulose membrane filter to collect the particulate matter.
- (2) Filters are digested using aqua-regia to destroy organic matter and the chromium containing residue is dissolved in dilute nitric acid.
- (3) The chromium solutions and appropriate standards are aspirated into the reducing air-acetylene flame of an atomic absorption spectrophotometer (AAS) using a hollow cathode lamp for chromium.

2. Apparatus

- (1) An air sampling device incorporating a mixed cellulose ester membrane filter.
- (2) An atomic absorption spectrophotometer equipped with an air-acetylene burner head:
 - (a) Chromium hollow cathode lamp;
 - (b) Oxidant: compressed air;
 - (c) Fuel: acetylene;
 - (d) Pressure-reducing valves: a 2-gauge, 2-stage pressure-reducing valve and appropriate hose connections are needed for each tank of compressed gas.
- (3) Glassware, borosilicate:
 - (a) 100 mL Griffin beakers with watch-glass covers;
 - (b) Pipettes, automatic, 10 mL (calibrated to an accuracy of $\pm 1\%$).

- (4) Adjustable, thermostatically-controlled hot plate (to 250°C).

3. Reagents

All reagents used should be ACS reagent grade or better.

- (1) Distilled or deionized water.
- (2) Concentrated nitric acid.
- (3) Concentrated hydrochloric acid.
- (4) Aqua-regia, prepared by mixing 3 volumes of concentrated hydrochloric acid with 1 volume of concentrated nitric acid.
- (5) Dilute nitric acid.
Dilute 1 mL of concentrated nitric acid to 100 mL with distilled or deionized water.
- (6) Aqueous stock standard solution containing 1000 $\mu\text{g Cr/mL}$.
Standard solutions are commercially available.

4. Procedure

- (1) Cleaning of equipment:
 - (a) Before use, all new glassware is soaked in detergent solution.
 - (b) Glassware is cleaned by soaking in an approximately one in five dilution of concentrated nitric acid for at least 6 hours, and then is rinsed thoroughly with tap water and de-ionized water, in that order, and then dried.

(2) Analysis of sample:

- (a) Transfer each sample filter to a clean 100 mL Griffin beaker;
- (b) Add 10 mL of aqua-regia from an automatic pipette. Cover with a watchglass and digest just below boiling on the hot plate for three hours;
- (c) Remove the watchglass and evaporate until the digest is just dry;
- (d) Add 20 mL of dilute nitric acid from an automatic pipette. Cover the beaker with the previously used watchglass and swirl gently to dissolve the residue;
- (e) After calibration of the AAS (see section 5) aspirate the solutions and record the absorbance;
- (f) If a sample gives results exceeding the upper limit of the linear range i.e. 2.5 µg/mL it should be suitably diluted in dilute nitric acid and re-analyzed;
- (g) Appropriate filter blanks are analyzed in accordance with the total procedure.

5. Calibration and Standards

(1) AAS operating parameters:

- (a) Wavelength: 357.9 nm;
- (b) Slit width: 0.7 nm;
- (c) Light source: a chromium hollow cathode lamp;
- (d) Flame type: a reducing air-acetylene flame.

(2) For the operating parameters quoted in section 5 (1), the working range for chromium is linear up to concentrations of 2.5 µg/mL.

(3) Prepare each day, 3 working standards of 0.5, 1.0 and 2.5 µg Cr/mL in dilute nitric acid. Aspirate each of the standard solutions and record the absorbance of each.

(4) Prepare a calibration curve by plotting, on linear graph paper, the absorbance versus the concentration of each standard in µg Cr/mL.

Note: Many modern spectrometers have the capability of being calibrated to read directly in concentration. Under these conditions the preparation and use of a calibration graph of absorbance versus concentration becomes unnecessary.

6. Calculations

- (1) Read the concentration in µg Cr/mL corresponding to the total absorbance from the standard curve. Multiply by 20 to obtain the total amount of chromium present in the sample.
- (2) Corrections for the blank shall be made for each sample provided that the amount of total chromium on all sample filters is greater than that on each field blank filter.

7. Sensitivity

- (1) A standard containing 1 µg Cr/mL should give an absorbance of 0.05.

8. Detection Limit

- (1) The detection limit was found to be 0.01 µg Cr/mL.

9. Recovery Study

Amount of Cr added to sample (µg)	Amount of Cr Recovered (µg)	% Recovery	No. of Samples	% Relative Standard Deviation
5.0	4.9	97.2	10	3.4
15.0	14.7	98.1	10	2.2

Notes: The data listed in sections 7 to 10 were obtained on a Perkin-Elmer 603 AAS using a hollow cathode lamp and a deuterium arc background.

The spectrophotometer was programmed to read directly in concentration. The equipment listed above is specified for clarification purposes only and should not be taken as an endorsement by the Ministry.

An inductively coupled plasma atomic emission spectrometer (ICP-AES) may be used in place of the atomic absorption spectrometer with minor adjustments in the preparation steps, where appropriate.

AIR SAMPLING METHOD FOR
TOTAL HEXAVALENT CHROMIUM COMPOUNDS

1. Principle of the Sampling Method

Air, possibly containing hexavalent chromium compounds, is drawn at a specified fixed flow rate for a known duration through a polyvinyl chloride (PVC) filter of specified pore size and diameter held in a worker's breathing zone by a plastic closed-face filter holder. The particulate matter or mists collected on the sample filter are then analyzed colorimetrically in a laboratory for the total quantity of hexavalent chromium present. In addition to personal sampling, area samples may be collected by this method by placing a sampling train on a suitable support at a strategically selected location with the inlet port facing downward.

2. Equipment

The sampling train used to obtain an air sample of total hexavalent chromium particulate is to include the following components, and satisfy the criteria suggested:

(1) A battery operated portable pump which:

(a) is capable of delivering, for 6-8 hours, not less than 2 litres of air per minute with a filter in the sampling train. The maximum deviation from the prescribed flow rate is not to exceed $\pm 5\%$ and it is suggested that the pump be equipped with a pulsation damper;

(b) is intrinsically safe, i.e. certified by an accepted agency as safe for use in potentially explosive atmospheres;

(c) includes a calibrated flow meter or a mechanism for maintaining a constant flow rate;

(d) has an on-off switch and flow rate control or adjustment mechanism which are as tamper-proof as possible.

(2) Polyvinyl chloride filters of appropriate size, preferably 37 millimetres (mm) in diameter, 5.0 micrometers in pore size.

(3) Filter support pads of the same size as the polyvinyl chloride filters used, preferably 37 mm in diameter.

(4) A closed-face filter holder of the same size as the polyvinyl chloride filters and the filter support pads used, preferably 37 mm in diameter and with an adapter which provides a leak-proof fit for connecting flexible tubing.

(5) A sufficient length of flexible tubing with appropriate wall thickness to prevent its collapsing when air is drawn through and with appropriate inner diameter which will provide a leak-proof connection to the filter holder adapter and to the inlet port adapter of the portable pump.

(6) A thermometer, accurate to $\pm 1^{\circ}\text{C}$, for ambient air temperature measurement if required.

(7) A barometer, accurate to ± 5 mm Hg (± 0.67 kPa), for measuring atmospheric pressure if required.

3. Sampling Procedure

(1) Preparation of Pumps

(a) The pump battery pack must be fully charged according to the manufacturer's instructions, before use. After a pump with a fully

charged battery pack has been operated for a duration as recommended by the manufacturer, another fully charged battery pack shall be substituted for the used one if continued operation of the same pump on the same day is intended.

- (b) Flow meters, or constant flow devices on the pumps shall be calibrated at 2.0 litres per minute with the filter/filter holder assembly in line by using a primary standard, such as a bubble meter, and the recommended procedure in the manufacturer's instructions for using such primary standard apparatus, after:

- (i) not more than 40 hours of operation;
- (ii) receiving unusually harsh or potentially damaging treatment;
- (iii) being disassembled for maintenance.

(2) Preparation of Filter Holders

- (a) Assemble the filter holders in a clean environment prior to initiation of sampling.
- (b) Each filter holder shall be prepared by the following procedure:
 - (i) use only a clean filter holder and handle the filter support pad and filter with tweezers. Place a filter support pad and a polyvinyl chloride filter in the base of a filter holder;
 - (ii) plug the inlet and outlet ports;
 - (iii) ensure that the joints of the filter holder are sealed with

non-porous, shrinkable cellulose band or tape.

(3) Sampling

- (a) Assemble the sampling train by fixing one end of the flexible tubing to the inlet port of the pump and the other end with the adapter to the outlet port of the filter holder.
- (b) Check for air leaks in the sampling train by turning on the pump and inserting a clean plastic plug into the inlet port of the filter holder. The air flow indicator on a pump with a flow meter should drop to the zero flow position and oscillate slightly. If this does not occur, find and either repair the leak if possible, or replace the faulty component.
- (c) Label the filter holder with an appropriate sample number.
- (d) Attach the pump preferably to the worker's belt or place it in a pocket; place the flexible tubing over the shoulder and clip the filter holder to the clothing as near as possible to the breathing zone, with the inlet port facing downward. Ensure that the sampling train does not interfere with the worker's movements.
- (e) Check again that the sampling train is properly assembled, remove the plastic plug from the filter holder's inlet port and switch on the pump. Allow the flow rate to stabilize for a short duration then adjust the rate to the pre-calibrated mark of 2.0 litres per minute, if the pump has a flow meter. Pumps with constant flow devices shall not be reset after the flow rate control mechanism has been calibrated to deliver air at this rate. A calibra-

ted external flow meter may be used to check the air flow rate.

- (f) Note the following information for each sample:

- (i) date of sampling;
- (ii) company name;
- (iii) model and serial number of the sampling pump;
- (iv) calibration date of sampling pump;
- (v) name of worker;
- (vi) job title;
- (vii) work or separation performed;
- (viii) filter holder or sample number;
- (ix) air flow rate;
- (x) time of initiation of sampling.

- (g) Ensure that for any sampling performed during any survey, two control or blank filters are prepared in the same manner as the sample filters. These blank filters shall remain in sealed filter holders during the survey (i.e. no air is to be drawn through these filters).

- (h) Sampling shall be carried out for a full workshift or operation during which the worker is exposed to hexavalent chromium. Sequential air samples may be taken as opposed to single air samples during a workshift or operation. Where it is necessary to obtain a better estimate of the worker's time-weighted average exposure, air sampling should be conducted for a sufficient number of workshifts or days in a work week.

- (i) Where a short-term exposure concentration determination is required, it shall be determined by following the procedure specified above but the air sample shall be taken for a period of 15 minutes. A

sufficient number of air samples should be taken during the time periods when peak concentrations are anticipated from a knowledge of the work process, work operation, work cycle, or work practices.

- (j) During the sampling interval, the sampling train shall be checked periodically to ensure that it is functioning properly. The air flow rate shall not be readjusted after the initial flow rate is set. If the flow rate changes significantly, terminate sampling and take another sample.

- (k) The ambient air temperature and pressure in the sampling area, if required, shall be recorded at least once.

- (l) To terminate sampling, perform the following sequence of steps:

- (i) check the air flow rate just prior to termination of air sampling;

- (ii) record the time of termination of sampling;

- (iii) switch off the pump and carefully remove the sampling train from the worker;

- (iv) remove the filter holder and insert clean plastic plugs into the inlet and outlet ports;

- (v) ship the filter and filter holder together to a laboratory and request analysis of the filter for total hexavalent chromium.

- (4) A sufficient number of area samples should be taken at selected work locations where necessary.

4. Calculation of Results

- (1) Corrections for the field blank are made for each sample provided that the various amounts of hexavalent chromium in all sample filters are greater than the amount of hexavalent chromium in each field blank filter.

- (2) The concentration of total hexavalent chromium in an air sample is calculated by using the following equation:

$$C = \frac{A}{F \times t}$$

Where C = concentration of total hexavalent chromium in mg/m^3 ;

A = corrected amount of total hexavalent chromium on the sample filter in μg ;

F = air flow rate in litres per minute; and

t = sampling duration in minutes.

5. Interferences

Where iron, mercury, vanadium or nitrates are also present in the work place atmosphere, possible interferences from these should be taken into consideration in the data interpretation of total hexavalent chromium analysis (see Determination of Total Hexavalent Chromium on Air Sampling Filters).

THE DETERMINATION OF TOTAL HEXAVALENT
CHROMIUM (Cr(VI)) ON AIR SAMPLING FILTERS

1. Principle of Method

- (1) Air is drawn at a specified flow rate for a known duration of time through a polyvinyl chloride (PVC) membrane filter to collect the particulate matter or mists.
- (2) The filter is extracted with hot, 3% sodium carbonate - 2% sodium hydroxide solution to dissolve all the Cr(VI) present and to protect it from reduction to trivalent chromium.
- (3) The extract is acidified with sulphuric acid and reacted with sym-diphenylcarbazide to form a coloured complex.
- (4) The amount of coloured complex formed is in direct proportion to the amount of Cr(VI) present and is determined by measuring the absorbance of the solution at 540 nm.

2. Apparatus

- (1) A UV-VIS spectrophotometer.
- (2) Cuvettes, 5 cm path length.
- (3) Adjustable, thermostatically-controlled hot plate (to 250°C).
- (4) A centrifuge.
- (5) Glassware, borosilicate:
 - (a) 50 mL Griffin beakers with watch-glass covers;
 - (b) Pipettes, volumetric, a selection in the range 1.0 to 10.0 mL;
 - (c) Pipettes, graduated, 2.0 mL;
 - (d) Volumetric flasks, 25 mL, 100 mL and 1000 mL;

(e) 15 mL centrifuge tubes.

- (6) Micropipette, adjustable in the range 100 to 1,000 μ L.
- (7) Filtration apparatus, vacuum, with PVC filter, 5 μ m pore size.

- (2) Concentrated sulphuric acid (98% w/v).
- (3) Sulphuric acid, 6 N.
Add 167 mL of concentrated sulphuric acid slowly to 700 mL of deionized water. Mix well, cool to room temperature and dilute to 1000 mL with deionized water.
- (4) Sulphuric acid, 0.2 N.
Add 5.5 mL of concentrated sulphuric acid slowly to 700 mL of deionized water. Mix well, cool to room temperature and dilute to 1000 mL with deionized water.
- (5) Sodium carbonate, Na_2CO_3 , anhydrous.
- (6) Sodium hydroxide, NaOH.
- (7) Potassium chromate, K_2CrO_4 , or potassium dichromate, $\text{K}_2\text{Cr}_2\text{O}_7$.
- (8) Sym-diphenylcarbazide, $\text{C}_6\text{H}_5\text{NHNHCO-NHNHC}_6\text{H}_5$.
- (9) Filter extraction solution.
Dissolve 20 g of sodium hydroxide and 30 g of sodium carbonate in 700 mL of deionized water. Mix well, cool to room temperature and dilute to 1000 mL with deionized water.

Store the solution in a tightly capped polyethylene bottle and prepare it monthly.

(10) Diphenylcarbazide solution.

Dissolve 0.50 g of sym-diphenylcarbazide in a mixture of 100 mL of acetone and 100 mL of deionized water.

Store in an opaque bottle at 4°C. The solution is stable for up to 1 month.

(11) Cr(VI) stock standard (1,000 µg Cr(VI)/mL).

Weigh out accurately approximately 3.735 g of potassium chromate or 2.829 g of potassium dichromate and dissolve it in 500 mL of deionized water in a 1000 mL volumetric flask. Dilute to 1000 mL with deionized water.

Store the solution in a polyethylene bottle, and prepare it every six months.

(12) Cr(VI) working standard (1 µg Cr(VI)/mL)

Dilute 1.0 mL of the Cr(VI) stock standard to 1000 mL with deionized water.

Prepare this solution every day. Calculate the correct concentration from the weight recorded in 3(11) and the dilution factors.

4. Procedure

(1) Cleaning of equipment.

(a) Before use, all new glassware is soaked in a detergent solution to remove any residual grease or chemicals.

(b) Glassware is cleaned by soaking in an approximately one in five dilution of concentrated nitric acid for at least 6 hours, and then is rinsed thoroughly with tap

water and deionized water, in that order, and then dried.

(2) Analysis of sample.

(a) Transfer each sample filter to a clean 50 mL Griffin beaker.

(b) Add 5.0 mL of filter extraction solution.

(c) Cover the beaker with a watch glass and heat it near the boiling point on a hot plate, with occasional swirling, for 30 to 45 minutes.

Note: Do not allow the solution to evaporate to dryness, because Cr(VI) may be lost due to reaction with the PVC filter. An indication that Cr(VI) has been lost in this manner is a brown-coloured PVC filter.

(d) Cool the solution to room temperature and transfer it quantitatively, with deionized water, to a 25 mL volumetric flask, keeping the total volume to about 20 mL.

Note: If the solution is cloudy, it shall be filtered through a PVC filter in a vacuum filtration apparatus, using deionized water rinses.

(e) Add 1.90 mL of 6 N sulphuric acid to the sample solution and swirl gently to mix.

Note: Carbon dioxide will be evolved, causing increased pressure in the flask.

(f) Let the sample sit for a few minutes, until vigorous gas evolution ceases, and then dilute to the mark with deionized water.

- (g) Add 0.5 mL of diphenylcarbazide solution and invert several times to mix thoroughly.
- (h) Discard about 10 mL of the contents of the flask, stopper the flask, and shake it vigorously several times, removing the stopper each time to relieve the pressure build-up.
- (i) Transfer the sample solution to a 15 mL centrifuge tube and spin tube and contents at about 3,000 rpm for 10 minutes.

Note: The developed colour complex is stable for at least 30 minutes.

- (j) Transfer the solution to a 5 cm cell and read the absorbance at 540 nm against a 0.2 N sulphuric acid solution.
- (k) An appropriate filter blank shall be analyzed in accordance with the total procedure.

5. Calibration and Standards

- (1) To a series of six 25 mL volumetric flasks, add 0.0, 0.1, 0.5, 1.0, 3.0 and 5.0 mL of the Cr(VI) working standard and dilute to the mark with 0.2 N sulphuric acid.
- (2) The flasks now contain: 0.0, 0.1, 0.5, 1.0, 3.0 and 5.0 μg of Cr(VI) respectively. The flask containing 0.0 mL of working standard solution is the reagent blank.
- (3) Treat the standards and blank in the same manner described in sections 4(2)g to 4(2)j.
- (4) Construct a calibration curve by plotting the net absorbance against μg Cr(VI)/25.5 mL.

6. Calculations

- (1) Filter blank results are to be subtracted from each sample provided that the amount of analyte on all filters is greater than that on each field blank filter.
- (2) From the calibration curve (section 5(4)), read the μg Cr(VI) corresponding to the absorbance of the sample. This amount corresponds to the total amount of Cr(VI) collected on the filter.

7. Interferences

- (1) Iron (III) and vanadium (V) give yellow diphenylcarbazide complexes, with colour intensities equal to 0.04 μg Cr(VI) given by 200 μg Fe (III) or 4 μg V (V). The vanadium complex is unstable, and samples containing vanadium in less than a 10-fold excess by weight over Cr(VI) may be determined accurately by allowing the solution to stand for 10 minutes after addition of the diphenylcarbazide. For samples containing large amounts of iron or vanadium, these elements are removed from the sample by extraction at pH 4 with 8-quinolinol in chloroform.
- (2) Mercury (I or II) reacts slowly with diphenylcarbazide to give a violet-blue precipitate. Addition of sodium chloride before colour development eliminates this interference.
- (3) Nitrates cause fading of the colour; this can be eliminated by buffering to pH 2 with sodium dihydrogen phosphate.
- (4) Chromium (III), when present up to 100 μg /sample, has no effect on the determination of 0.5 μg Cr(VI).

8. Detection Limit

The detection limit was found to be 0.1 µg Cr(VI) per filter.

9. Precision

Standard Solution being measured µg Cr ⁶⁺ /25.5 mL	No. of Samples	% Relative Standard Deviation
0.1	10	3.8
0.5	10	1.3
1.0	10	0.7
3.0	10	0.5
5.0	10	0.4

10. Recovery Study

(1) The spiking agent was potassium chromate.

Amount of Cr(VI) added to sample (µg)	Amount of Cr(VI) recovered (µg)	% Recovery	No. of Samples	% Relative Standard Deviation
0.10	0.100	100.0	10	9.3
1.00	0.958	95.8	10	1.8
5.00	4.795	95.9	10	0.7

(2) The spiking agent was lead chromate, an example of an insoluble chromate.

Amount of Cr(VI) added to sample (µg)	Amount of Cr(VI) recovered (µg)	% Recovery	No. of Samples	% Relative Standard Deviation
5.0	4.75	94.9	10	1.1
5.0	4.74	94.8	10	0.6

MINISTRY OF LABOUR

NOTICE OF PROPOSED AMENDMENT TO THE REGULATION RESPECTING MERCURY ONTARIO REGULATION 141/82

TAKE NOTICE that subsection 3(3) of the Regulation respecting Mercury may be amended so that the Regulation applies to a constructor, employer or worker engaged in the alteration, repair, dismantling, demolition or structural maintenance of a chlor-alkali plant.

TAKE NOTICE that briefs or submissions are called for as to whether the amendment should be made and that such briefs or submissions are to be submitted within 60 days of the publication of this notice in The Ontario Gazette.

The government is committed to an open and consultative process for the development of designated substance regulations on the basis that this is more likely to result in quality regulations which are more understandable and acceptable to the affected parties. In order to ensure the most expeditious adoption of this amendment, dates have been specified in the next paragraph when certain steps in the process are expected to take place. These dates will be adhered to.

All comments that are received in response to this notice will be analyzed and any proposed revision to the amendment arising from these comments will be presented at a public meeting to take place not later than June, 1986 for review and further comment. These additional comments will then be analyzed and the amendment may be further revised. It is intended that the amendment will be transmitted to the Advisory Council on Occupational Health and Occupational Safety by September, 1986.

Control Strategy

The Ministry has proposed the following strategy to control exposure to mercury on construction projects:

1. An amendment to subsection 3(3) of the Regulation respecting Mercury to read as follows:
 - 3(3) subsection 3(2) and sections 4 to 17 of this Regulation do not apply to,
 - (a) a constructor, an employer who is carrying out a project or a worker working on a project, except a constructor, employer or worker engaged in the alteration, repair, dismantling, demolition or structural maintenance of a chlor-alkali plant.

2. The development of guidelines for distribution to the construction industry on the safe handling of equipment containing mercury, including procedures to follow in the event of a spill.

Exposure to significant levels of mercury has been shown to occur during the demolition or alteration of a chlor-alkali plant using mercury-cell technology. Because of the length of time needed to demolish chlor-alkali plants and the known possibility of exposure, procedures such as air monitoring and medical surveillance are feasible on these projects.

Except for these plants the Ministry has limited information on exposure of workers to mercury during construction work. The Ministry is particularly interested in receiving comments and suggestions on the following topics:

1. whether the proposed amendment and the guidelines are sufficient to protect workers from mercury exposure in the construction industry.
2. whether there are additional areas of construction which should be included in the proposed amendment.
3. whether the use of a guideline is a suitable strategy to control exposure in the event of a spill of mercury from equipment in construction.
4. whether most exposures to mercury would be minimal due to the short time required for the completion of many jobs in the construction industry.
5. whether there would be mercury exposure of workers with respect to renovation and demolition work other than at a chlor-alkali plant.
6. whether it would be possible to monitor mercury exposure occurring as a result of a spill.

Comments on the proposed amendment of subsection 3(3) of the Regulation respecting Mercury and on the proposed development of guidelines must be submitted by March 19, 1986 to:

ASSESSMENT ACT

O. Reg. 4/86.

Equalization of Assessments made under
Section 63 of the Assessment Act.

Made—January 8th, 1986.

Filed—January 9th, 1986.

REGULATION MADE UNDER THE ASSESSMENT ACT

EQUALIZATION OF ASSESSMENTS MADE UNDER SECTION 63 OF THE ASSESSMENT ACT

1. The equalization of assessment made under the Act in each prescribed class of real property necessary in order to provide for each municipality specified in the Schedule to this Regulation, assessments of real property that, in accordance with section 63 of the Act, will be equitable one with the others in each prescribed class of real property shall include, as standards to be taken into account in such equalization and the computation of the factors resulting therefrom, the following considerations:

1. The proportion that the municipal and school taxes levied for the year 1985 against the total assessment of real property in each prescribed class of real property is of the total municipal and school taxes levied for the year 1985 in the municipality shall be maintained to the extent that, if that single mill rate that would have been required to produce in the year 1985 the amount of municipal and school taxes levied in that year against the total assessment of the prescribed class of real property were applied to the total assessment for that prescribed class of real property resulting from the application of the factors hereafter in this Regulation prescribed for that class of real property in that municipality, the municipal and school taxes that would have been so levied for the year 1985 from the total assessment for that prescribed class will be substantially the same total amount for that prescribed class of real property as was actually levied in the municipality for the year 1985 against the total assessment for that prescribed class of real property in that municipality.

2. All real property within a prescribed class of real property in the same municipality shall, as nearly as may be, be assessed at the same proportion of the market value of such real property in the year 1980, as that market value is determined by the Assessment Commissioner in whose Assessment Region such real property is located.

3. The total assessment, including assessments made under section 32 or 33 of the Act, of the real property in a municipality to which this Regulation applies shall not be increased or decreased substantially.

4. Equitability of assessment of real property within each prescribed class of real property in the same municipality shall be established without significant alteration of the assessment relationships between prescribed classes of real property in the same municipality, provided that this paragraph does not apply to affect changes in the assessment relationship between prescribed classes of real property that result from an increase in the total assessment of the prescribed class of real property by reason of assessments made under section 32 or 33 of the Act. O. Reg. 4/86, s. 1.

2. This Regulation applies to the municipalities named in the Schedule to this Regulation and to the assessment to be shown on the assessment roll to be returned in each municipality for the year 1985 for taxation in the year 1986 and for every assessment made in each municipality for taxation in each subsequent year until a new reassessment of all property within that municipality is made under subsection 63 (3) of the Act. O. Reg. 4/86, s. 2.

3. For the purposes of this Regulation, the real property situate in each municipality named in the Schedule to this Regulation shall be divided into the prescribed classes of real property that are designated in the said Schedule for that municipality. O. Reg. 4/86, s. 3.

4. For the purposes of this Regulation, the factor to be applied to the market value, as determined in accordance with paragraph 2 of section 1, of real property in each prescribed class of real property in the municipality shall be that shown in the Schedule to this Regulation opposite the number of the prescribed class applicable to that municipality. O. Reg. 4/86, s. 4.

5. For the purposes of this Regulation, the following classes of real property are prescribed:

CLASS 1

Property assessed either,

- (a) as residential and comprising not more than six residential units, including vacant land

municipally zoned principally for residential development described in this clause; or

- (b) as seasonal residential including vacant land zoned principally for this purpose.

CLASS 2

Property assessed either,

- (a) as residential and comprising seven or more residential units, including vacant land municipally zoned principally for residential development described in this clause; or
- (b) as a unit or proposed unit within the meaning of the *Condominium Act* to which subsection 65 (2) of the *Assessment Act* does not apply and that is part of a building or parcel of land containing seven or more residential units, whether or not such residential units are units or proposed units within the meaning of the *Condominium Act*.

CLASS 3

Property assessed as commercial, including vacant land municipally zoned principally for commercial development.

CLASS 4

Property assessed as industrial, including vacant land municipally zoned principally for industrial development.

CLASS 5

Property assessed as farm land.

CLASS 6

Property assessed as a pipe line.

CLASS 7

Property assessed as a railway right of way.

O. Reg. 4/86, s. 5.

6.—(1) The rates contained in Schedule 3 to Ontario Regulation 316/83 shall apply to the assessment for taxation of all pipe lines liable to assessment and taxation under section 24 of the Act and located in or on the boundary of any municipality, part of a municipality or territory without municipal organization comprised in a locality named in the Schedule to this Regulation.

(2) For the purposes of clause 24 (16a) (b) of the Act,

- (a) where two or more pipe lines occupy the same right of way, each pipe line occupying the right of way is a second and subsequent pipe line, except that which bears the highest assessed value computed by applying the

rates in Schedule 3 to Ontario Regulation 316/83 without the reduction in rates for the second and subsequent pipe lines occupying the same right of way provided for in clause (b), but where two or more pipe lines occupying the same right of way have the same assessed value so computed and that assessed value is the highest assessed value or is the only assessed value for the pipe lines occupying that right of way, each of such pipe lines is designated as a second and subsequent pipe line except that one that was first in use as a pipe line; and

- (b) where a right of way occupied by a pipe line that is not designated to be a second or subsequent pipe line under clause (a) is also occupied by a pipe line that is designated to be a second and subsequent pipe line, each pipe line so designated shall be assessable and taxable at 75 per cent of the rate in Schedule 3 to Ontario Regulation 316/83 that is applicable to each pipe line so designated.

ENVIRONMENTAL ASSESSMENT ACT

O. Reg. 17/86.

Exemption—Ontario Hydro—OH-33.

Made—January 9th, 1986.

Filed—January 16th, 1986.

ORDER MADE UNDER THE ENVIRONMENTAL ASSESSMENT ACT

EXEMPTION—ONTARIO HYDRO—OH-33

Having received a request from Ontario Hydro that an undertaking, namely:

the program of property acquisition, planning, designing, construction, relocating, operating, maintaining and decommissioning new electric generating facilities less than 3000 kW in remote communities not connected to the provincial power grid to cover emergency situations, improved energy production efficiency or a predicted shortage of generating capacity, including associated heat recovery systems fitted to facilities to permit the recovery of by-product heat energy which otherwise would be rejected as waste energy,

be exempt from the application of the Act pursuant to section 29; and

Having been advised that if the undertaking is subject to the application of the Act, the following injury, damage or interference with the persons and property indicated will occur:

A. The public will be interfered with by the delay in installing:

- (i) generating capacity which is required to provide and maintain an adequate, reliable and economic power supply, and where appropriate,
- (ii) by-product heat recovery which will normally displace the use of more expensive, non-renewable fuels.

B. Ontario Hydro will be interfered with and damaged by the undue delay and expense required to prepare individual environmental assessments for projects that are primarily of a minor nature and have no significant adverse consequences on the environment, and

Having weighed such injury, damage or interference against the betterment of the people of the whole or any part of Ontario by the protection, conservation and wise management in Ontario of the environment which would result from the undertaking being subject to the application of the Act;

The undersigned is of the opinion that it is in the public interest to order and orders that the undertaking is exempt from the application of the Act for the following reasons:

A. The Ministry of Energy and the Ministry of Northern Development and Mines have jointly undertaken pre-submission consultation and preparation of a Draft Class Environmental Assessment for Remote Energy Supply. Ontario Hydro has agreed to use this draft as a model for a new Class EA document or to jointly submit a Remote Energy Supply Class EA with the above ministries.

B. The undertaking is unlikely to have any significant adverse effects on the environment and, therefore, the interference with the delivery of Ontario Hydro generation and waste heat recovery programs which would be caused by the preparation and approval of individual environmental assessments for these projects would be undue.

C. The installation of new generating facilities and/or heat recovery systems is subject to review and approval under the *Environmental Protection Act* where emissions will be produced.

This exemption is subject to the following terms and conditions:

1. Ontario Hydro shall submit a Class Environmental Assessment covering this undertaking before January 1, 1987, unless a different method of ensuring compliance

with the EA Act for this class of projects is agreed to between Ontario Hydro and the Ministry of the Environment before that date and a record of such agreement is placed in the public record maintained for this Order.

2. This exemption shall terminate on January 1, 1989 or, if earlier, the date on which approval to proceed with the undertaking is received under the Act.
3. Ontario Hydro shall consult with the Director of the Environmental Assessment Branch in cases where it appears that the activity would result in significant adverse environmental changes so that Ontario Hydro and the Minister of the Environment may decide whether the project should proceed pursuant to an individual environmental assessment rather than this Order.
4. An Environmental Report shall be prepared by Ontario Hydro for each project initiated under this Exemption Order and shall be submitted to the Director of the Environmental Assessment Branch at least 30 days prior to the proposed implementation of such activities. A copy of the Environmental Report shall also be submitted to the Director of the appropriate Ministry of the Environment Regional office. This Report will be filed in the public record.
5. Ontario Hydro shall make the Environmental Report for each project available within the affected community in such a manner as Ontario Hydro deems appropriate.
6. Staff of Ontario Hydro and the Environmental Assessment Branch shall develop content guidelines for the environmental reports identified in Condition No. 4. These guidelines are to be completed by July 1, 1986. In the interim, the contents of Environmental Reports will be agreed upon between the proponent and the Environmental Assessment Branch on a case-by-case basis.
7. Where any activity which otherwise would be exempt under this Order is being carried out as, or is part of, an undertaking for which an environmental assessment has been accepted and approval to proceed received, the activity shall be carried out in accordance with any terms or conditions in the approval to proceed.
8. Where any activity which is the subject of this Order is being carried out as, or is part of, another undertaking which is the subject of an exemption order under the Act, the activity exempt under this Order shall be carried out in accordance with any terms

or conditions in the other exemption order as well as the conditions in this Order.

7.—(1) A reference in subsections 5 (1) and (6) to any page number is a reference to that page (foot pagination) in *The Ontario Gazette* dated the 6th day of July, 1985.

(2) A reference in subsections 5 (2), (3), (4) and (5) to any page number is a reference to that page (foot pagination) in *The Ontario Gazette* dated the 19th day of May, 1984.

Schedule 15

Schedule of Benefits

PREAMBLE

A. General

1. The rates listed in this Schedule of Benefits are the maximum payments which can be made by the Ontario Health Insurance Plan.

2. Insured medical services are limited to the services which are medically necessary, which are listed in this Schedule of Benefits and which are not specifically excluded by legislation or regulation. (See Appendix for list of specific exclusions).

3. Additions, deletions or other modifications of the Schedule of Benefits require recommendation by the Ontario Health Insurance Plan. Such recommendations are made in consultation with the Ontario Medical Association.

4. This Schedule is a public document and frank discussion with patients regarding the listed rates is recommended.

5. Claims for services which are not listed in the Schedule or which are listed as N.A.B. (not a benefit) or which are excluded as benefits by legislation or regulation should not be submitted to the Plan. Such services may be charged directly to patients or others requesting them.

6. The principles governing proper professional charges are incorporated in the Regulations (Medicine) of the Health Disciplines Act.

7. Each physician who participates in the care of a patient is entitled to compensation commensurate with the services he renders.

8. Whenever possible, the physician should acquaint the patient or person financially responsible with his obligations to those concerned with his care. This is particularly important where supportive or concurrent care is rendered or when a consultation and/or procedure are being arranged.

9. Each physician participating in the care of a patient should render to the patient, or to the financially responsible party, an itemized statement of charges for professional services.

10. Each physician participating in the care of a patient should, on request, send a receipt to the patient for all payments made by him.

11. If fees are collected by an organized group, the name of the physician rendering the service should be clearly shown on the bill or claim card.

12. Claims may be submitted for services which a patient receives from the team of staff man, resident, intern and clerk in a teaching unit, provided that the conditions as set out hereunder apply.

On October 10, 1972, the Minister of Health confirmed that the joint recommendations of the College and the O.M.A. governing the charging of fees for services provided by interns and residents in clinical teaching units are acceptable to the Ministry of Health. In his letter the Minister made it very clear that he is looking to the College and the Medical Schools to ensure that the ethical rules governing these billing procedures are followed meticulously in all cases.

It has been carefully explained that the responsible staff man must be present in the clinical teaching unit at the time the services are rendered and must be identified to the patient at the earliest possible moment. No fees are to be charged for services given by the intern or resident prior to this identification taking place. The following rules are now in effect:-

When patient care is rendered in a clinical teaching unit or other setting for clinical teaching by a health care team, the physician responsible shall be personally identified to the patient. His relationship to the team shall be defined by the clinical teaching unit Director and his role must be known to the patient and other members of the team. He shall assume full responsibility for the appropriateness and the quality of the services rendered.

Specific regulations must vary with the service and form of care being delivered:-

- (a) In order to claim for physical procedures being carried out by an intern or resident, the responsible staff man must be in the clinical teaching unit and immediately available to intervene.
- (b) In psychotherapy where the presence of the staff man would distort the psychotherapy milieu, it is appropriate for the staff man to claim for psychotherapy when a record of the interview is carefully reviewed with the resident and the procedure thus supervised. However, the time charged by the staff man may not exceed the total time spent by him in both such interview and in direct supervision.
- (c) In other departments or services, the staff man should only claim for visits on the days when actual supervision of that patient's care takes place through the presence of that staff man in the clinical teaching unit on that day. This, of course, involves a physical visit to the patient and/or a chart review with detailed discussion with the other member(s) of the health team.
- (d) In those situations where on a regular basis a staff member might supervise concurrently multiple procedures or services through the use of other members of the team, the total claims made by the staff man shall not exceed the amount that the staff man might make in the absence of the other members of the team.

Any claim rendered should be in the name of the responsible staff man.

13. Charges for missed appointments are not benefits of OHIP.

PREAMBLE

B. Terms and Definitions:

Call or Visit: is the service by a physician to a patient for assessment and/or treatment.

1. Consultations:

- (a) Consultation refers to the situation where a physician, in light of his professional knowledge of the patient, requests the opinion of another physician competent to give advice in this field, because of the complexity, obscurity or seriousness of the case or because another opinion is requested by the patient or an authorized person acting on his behalf. The consultant is obliged to perform a general or specific assessment, review the laboratory or other data and submit his findings, opinions and recommendations in writing to the referring physician.
- (b) If a consultant is requested by a physician on duty in the emergency department to see a patient in consultation, the former may charge a consultation fee for this service. If the consultant is requested to perform this same service by a resident or intern, the former may charge a general or specific assessment according to his specialty.
- (c) Consultations required by hospital by-law and/or statute are not insured service except where contrary indications are noted in this Schedule.
- (d) For laboratory and procedural benefits connected with consultations, see listings of Diagnostic and Therapeutic Procedures and Laboratory Medicine.
- (e) A consultation is not to be claimed as such when:
 - (i) The patient presents himself to a consultant's office without prior knowledge of the primary physician.
The sending of a report to the primary physician under these circumstances does not justify a consultation.
 - (ii) The primary physician is not asked for professional advice but is simply asked by the patient for the name a specialist in a particular field and the patient seeks out the specialist himself.
- (f) A repeat consultation requires all of the criteria of a full consultation and implies interval care by the primary physician. The situation in which the consultant requests the patient to return for a later examination is not a repeat consultation.
- (g) A limited consultation may involve all the components of a full consultation but is less demanding, and in terms of time, normally requires substantially less of the physician's time than the full consultation.
- (h) A diagnostic radiology consultation applies when radiographs made elsewhere are referred to a radiologist for his written opinion or when a radiologist is required to make a special visit at Night (5:00 p.m. to 7:00 a.m.) or Saturdays, Sundays and Holidays to consult on the advisability of performing a diagnostic radiological procedure which eventually is not done. A consultation does not apply when the radiographs referred to above are used for comparison purposes with radiographs made in the consultant's facilities.
- (i) A diagnostic laboratory medicine consultation applies when tissue, slides, and/or specimens are referred to a second pathologist not in the same institution for a written opinion. It includes secretarial or other assistance but does not apply when the above are used for comparison with tissue, slides, materials or tests done in the consultant's facilities. When a diagnostic laboratory medicine consultation fee is claimed, surgical pathology fees may not also be claimed.
- (j) A laboratory medicine consultation or repeat consultation applies when a laboratory medicine physician is requested to examine a patient and provide a written opinion.
- (k) A diagnostic nuclear medicine consultation applies when nuclear medicine studies are referred to a nuclear medicine specialist for a written opinion, or when the nuclear medicine physician is required to make a special visit at Night (5:00 p.m. to 7:00 a.m.) or Saturdays, Sundays and Holidays to consult on the advisability of performing a nuclear medicine procedure which eventually is not done. A consultation does not apply when procedures done elsewhere are used for comparison purposes with nuclear medicine studies made in the consultant's facilities.
- (l) A nuclear medicine consultation or repeat consultation applies when a nuclear medicine specialist is requested to examine a patient and provide a written opinion, all of which takes a greater amount of time and effort than a nuclear medicine study would normally require. It may be done in conjunction with a nuclear medicine study but if so, the lesser professional fee (P_2) rather than the greater fee (P_1) should be claimed in addition to the technical fee (T).
- (m) Some nuclear medicine specialists have other specialist qualifications which allow them to claim another consultation (e.g. internal medicine). A nuclear medicine consultation or repeat consultation may be claimed in lieu of another consultation (e.g. internal medicine) but would not be combined with such a consultation by the same consultant.
- (n) A prenatal consultation by a paediatrician applies when a physician considers a foetus of greater than 20 weeks gestation to be at risk or in jeopardy by reason of continuation of pregnancy in the presence of maternal and/or foetal distress, and requests the opinion of a paediatrician competent to give advice in this field. The paediatrician shall perform a general or specific assessment, review laboratory and other data and submit his findings and recommendations in writing to the referring physician. Such a consultation does not preclude the paediatrician from a post-natal consultation on the infant.
- (o) A special surgical consultation may apply when a surgeon provides all the components of a regular consultation but is required to spend at least fifty minutes with the patient (exclusive of any tests) in consultation because of the very complex, obscure or serious nature of the problem. The surgeon should claim \$89.90 for special consultations on an I.C. basis (A935). See para 32 section B.

PREAMBLE

- (p) An emergency physician consultation applies when a patient is referred by another physician (other than an E.R. physician) who has seen and examined the patient and requested the opinion of an emergency room physician because of the complexity, obscurity or seriousness of the case. The consultant shall perform the necessary assessment, review the laboratory, x-ray or other data and submit his findings, opinions and recommendations in writing to the referring physician. A copy of the E.R. chart does not constitute a consultation report. This consultation is not chargeable for the routine transfer of care to the E.R. nor for the provision of treatment for a previously diagnosed condition. It does not apply to patients who present themselves to the E.R. or are brought by people acting on their behalf. It is anticipated that these consultations will replace some of the consultations that would otherwise be provided by consultants in other branches of medicine. If the consultation leads to admission to hospital, no separate fee is chargeable for the admission assessment by the same physician. The consultation fee for a specialist in emergency medicine (F.R.C.P.) is \$49.70 (H055); for all others, \$31.70 (H065).

Note: OHIP benefits for consultations normally are limited to one consultation per year, per patient, by any one physician. However, if the same patient is referred to the same consultant a second time within the year with a clearly defined unrelated diagnosis, one additional consultation may be claimed per year.

2. **General Assessment:** shall comprise a full history, an enquiry into, and an examination of all parts or systems (and may include a detailed examination of one or more parts or systems), an appropriate record, and advice to the patient.*

OHIP benefits for general assessments normally are limited to one per year per patient by any one physician. However, if the same patient presents again within the year to the same physician with a clearly defined new diagnosis, one additional general assessment may be claimed per year. In the case of a patient who proceeds normally to hospital, the admitting physician may claim one additional general assessment per year provided 90 days have elapsed since the last general assessment rendered (anywhere) to that patient by the admitting physician. If the patient doesn't qualify for a general assessment by the admitting physician, he may claim a general re-assessment.

3. **General Re-Assessment:** shall comprise the same services as a general assessment except that the history need not include all the detail already obtained in the original general assessment.*

OHIP benefits for general re-assessments, except for hospital admission re-assessments, are limited to two per year, per patient, by any one physician.

4. **Specific Assessment:** shall comprise a full history of the presenting complaint, enquiry concerning, and detailed examination of the affected part, region or system, as needed to make a diagnosis, and/or exclude disease and/or assess function, an appropriate record, and advice to the patient.* (This may vary among sections.)

Physicians qualified in two specialties (EENT for example) may only claim for one visit, e.g.: a consultation (if referred) or a specific assessment (if non-referred), if both systems are examined during the same visit. However, two consultations or two specific assessments, etc. may be claimed if both systems are examined, each on a separate visit.

OHIP benefits for specific assessments normally are limited to one per year, per patient, by any one physician. However, if the same patient presents again within the year to the same physician with a clearly defined new diagnosis, one additional specific assessment may be claimed per year.

5. **Specific Re-Assessment:** shall comprise a full relevant history and a comprehensive physical examination of one or more systems but not requiring an evaluation of the patient as a whole.* This service is the admission assessment when the patient has been seen prior to admission in the same illness. It is included in the surgical fee except for those procedures marked I.O.P.

6. **Partial Assessment:** shall comprise a history of the presenting complaint, the necessary physical examination, an appropriate record and advice to the patient. It also applies to subsequent visits for assessing the response to treatment and/or advice provided in a previous service.

7. **Intermediate Assessment:** is a primary care service for physicians providing general practice or paediatric services and is a more extensive assessment than a minor assessment. It shall comprise a history of the presenting complaint(s), enquiry concerning and examination of the affected part(s), region(s), or system(s) or mental or emotional disorder as needed to make a diagnosis, exclude disease and/or assess function, an appropriate record, and advice to the patient.*

8. **Multiple Systems Assessment:** shall comprise a detailed history and examination of more than one system, part or region, an appropriate record and advice to the patient.

9. **Minor Assessment:** is a visit which involves a direct doctor-patient interaction at which either or both of the following are provided and an appropriate record made of the visit:

- (a) a brief assessment which includes the necessary history and examination of the affected part or region or mental or emotional disorder;
- (b) brief advice or information regarding health maintenance, diagnosis, treatment and/or prognosis.

10. **Mini Assessment:** applies when a physician examines and/or treats a patient for a completely unrelated problem in addition to the examination/treatment of a W.C.B. related problem (for which the W.C.B. will only pay a minor assessment) during the same office visit. The fee for the mini assessment is \$6.40 (A008).

*For laboratory and other investigation performed in conjunction with a consultation or visit, see Diagnostic and Therapeutic Procedures and Laboratory Medicine.

PREAMBLE

11. **Re-Assessments** (by physician on duty in the Emergency Department): one re-assessment may be charged when, at least two hours after the original assessment is completed (including appropriate investigation and necessary treatment), a subsequent assessment indicates that further provision of care and/or investigation is required and performed. Re-assessments are not to be claimed for discharge assessments nor when the patient is admitted by the physician on duty in the Emergency Department, nor when this assessment leads directly to referral for consultation.
12. **Well Baby Care**: the periodic visits of a well baby during the first two years of life involving complete examination with necessary weight and measurements and instructions to the parent(s) regarding health care.
13. **Annual Health or Annual Physical Examinations (Including Primary and Secondary School Examinations)**: shall comprise all the elements of a general assessment as it pertains to an individual after the second birthday who presents and reveals no apparent physical or mental illness.
OHIP benefits for any one physician are limited to one Annual Health Examination per patient per year after the second birthdate. To qualify, an Annual Health Examination normally must be requested by the patient rather than a third party. Regulation 452 of Revised Regulations of Ontario, 1980 under the Health Insurance Act, examinations for the purpose of "legal requirements or proceedings" are excluded from coverage. However, it is recognized that an annual Health Examination will satisfy some or all of the requirements for examinations required by statute but excluded by the above mentioned Regulation. In such instances and where a prior claim for an Annual Health Examination has not been submitted to the Plan in the previous twelve months for that patient, it would be appropriate to submit a claim to OHIP for this service. The OHIP benefit in these cases covers the Annual Health Examination only and not any charges peculiar to the legal requirements, such as charges for the completion of forms.
14. **Long Term Institutional Care**: includes the listings for consultations, assessments and other visits to patients in chronic care hospitals, convalescent hospitals, nursing homes and other institutions in which such patients are covered by extended care legislation.
Admission Assessments to Long Term Care Institutions:
Type 1 - applies when the admitting physician has not performed a consultation, general assessment or general re-assessment prior to admission and when he carries out a general assessment (on admission) and provides a report for the medical record.
Type 2 - applies when the admitting physician has performed and claimed for a consultation, general assessment or general re-assessment prior to admission, makes an initial visit and records an admission note describing the condition of the patient following admission.
Type 3 - applies when the admitting physician readmits a patient after a 7 day stay in another institution; the admitting physician shall carry out a general re-assessment and provide a report for the medical record.

Note: When a physician already is in the institution and is asked to assess one of his own in-patients on a non-emergent or an emergent basis, the subsequent visit listings apply. However, if he is asked to assess another physician's patient on an emergency basis, the General Listings should be used.
15. **Subsequent Visits to Long Term Care Institutions**: include the supervisory care as well as the active treatment of acute intercurrent illness when the physician is already in the long term care institution. The supervisory care component includes discussion with the patient and/or family and/or examination of the patient and also includes as required, discussion with the nurse, chart review and annotation of the chart. When acute intercurrent illness requires a special visit, the appropriate fees under General Listings and Premiums apply. For acute intercurrent illnesses requiring visits after the monthly maximums have been claimed, extra visits should be made on an I.C. basis (W121 - \$11.85).
16. **Pre-dental General Assessment**: is the history and examination of a patient required prior to dental surgery under anaesthesia in hospital. A diagnosis is not required by OHIP for this service.
17. **Newborn Care**: is the routine care of a well baby up to ten days of age and should include a complete physical examination of the baby and necessary instructions to the mother. The service shall involve at least two visits and normally may not be claimed for the same patient by more than one physician.
When a well baby is transferred to another hospital (because of the mother's state of health, for example) claims for newborn care by a physician at each hospital may be appropriate.
18. **Low Birth Weight Baby Care**: is the care of a baby weighing less than 2.5 kilograms at birth.
19. **Psychotherapy**: is any form of treatment for mental illness, behavioural maladaptations, and/or other problems that are assumed to be of an emotional nature, in which a physician deliberately establishes a professional relationship with a patient for the purposes of removing, modifying, or retarding existing symptoms, or attenuating or reversing disturbed patterns of behaviour, and of promoting positive personality growth and development. Accordingly, therefore, a psychotherapeutic procedure may be claimed if a half hour or major part thereof has been spent by a physician in such treatment of the patient. The minimum time period for psychotherapy (to be charged as such) is twenty minutes. In order to claim for a major portion of a second or subsequent time interval of psychotherapy for the same patient during the same visit, the preceding time interval must be a full 30 minutes of psychotherapy. When psychotherapy extends beyond thirty minutes, the major part (16 minutes) of the next half hour must be spent with the patient to qualify for an additional half hour fee. Similarly, after one hour of psychotherapy, the major part (16 minutes) of the next half hour, must be spent to qualify for an additional half hour, and so on.

PREAMBLE

20. **Counselling:** as distinct from psychotherapy, is that form of activity in which the physician engages in an educational dialogue with the patient(s), on an individual or group basis wherein the goal of the physician and patient(s) is to become aware of the patients' problems or situation and of modalities for prevention and/or treatment. Counselling is not to be claimed for the advice that is a normal part of any consultation or assessment, for ongoing treatment or as a substitute for patient assessment fees. Counselling must be rendered personally, by the attending physician.
21. **Genetic Counselling:** includes interviewing the appropriate family members, the collection and assessment of adequate clinical and genetic data to make a diagnosis, construct a pedigree and assess the risks to persons seeking advice. It includes imparting this information and the various alternatives to the appropriate family members for dealing with the problem in such a way that they can make informed decisions about the genetic problem.
22. **Documentation:** when a physician examines or treats a patient, an appropriate record of such service should be made. (See Appendix B).
23. **Visit for Procedure:** when the sole reason for an office visit is the performance of a certain procedure, the listed benefit for the procedure will apply. (See Diagnostic and Therapeutic Procedures Preamble for exceptions). When procedures are carried out in the office, emergency or outpatient department on an elective basis, special visit fees should not be claimed in addition to the procedural fee. When procedure(s) are carried out by a physician's employee(s) under the direct supervision of the physician in his office, the usual claims may be made for procedure(s) which are generally and historically accepted as those which may be carried out by the nurse or other medical assistant in the employ of the physician. "Procedures" in this context do not include such services as assessments, consultations, psychotherapy, counselling, etc. Direct supervision requires that during the procedure the physician be physically present in the office or clinic at which the service is rendered.** While this does not preclude the physician from being otherwise occupied he must be in personal attendance to ensure that procedures are being performed competently and he must at all times be available immediately to approve, modify or otherwise intervene in a procedure as required in the best interests of the patient.
- For physiotherapy procedures performed under direct physician's supervision as detailed above, see Code G467 listed in Diagnostic & Therapeutic Procedures - Physical Medicine.

**Some procedures may not require the physical presence of a physician for adequate supervision. Exceptions to this requirement of direct supervision may be made upon recommendation of the Ontario Medical Association and the College of Physicians and Surgeons of Ontario.

24. **Health Examination:** this may vary in extent according to the purpose for which required (e.g. pre-employment, insurance, free from infection, etc.). This is not a benefit of OHIP and the fee should be according to the type of assessment necessary for this purpose and billed to the patient or party requesting the service.
25. **Age:** (unless otherwise specified)
 Newborn - up to 10 days of age.
 Infant - up to 2 years.
 Child - up to and including 15 years.
 Adolescent - up to and including 17 years.
 Adult - 18 years or over.
26. **Most Responsible Physician:** is the attending physician who is primarily responsible for the day to day care of the patient in hospital. In cases of unusual severity where the consultant assumes the role of the most responsible physician, the consultant may claim on a per visit basis and the family physician may claim supportive care. Where the family physician remains the most responsible physician and requests only a consultation, the family physician may claim on a per visit basis and the consultant may claim a consultation only.
27. **Transferral and Referral:**
 (a) A **referral** takes place when one physician requests for his patient the services of another. The services of the latter may consist of:
 (i) an opinion (i.e. a consultation).
 (ii) diagnostic tests or procedures (e.g. skin test, biopsy, etc.).
 Note: In such cases the referring physician continues to treat the case himself.
 (iii) treatment (surgical or medical).
 The referring physician's OHIP registration number must be included on the claim submission.
 (b) A **transferral**, as distinguished from a referral, takes place where the responsibility for the care of the patient is completely transferred permanently or temporarily, from one physician to another (e.g. where the first physician is leaving temporarily on holidays and unable to continue to treat the case). Physicians who are substituting for other physicians should consider that patients of the latter have been temporarily transferred (not referred) to their care. The physician to whom the patient is transferred should be regarded as substituting for the other physician. Where the care of the patient

PREAMBLE

involves a benefit containing several components such as surgery, the physicians may consider the surgical benefit a team benefit and decide among themselves how each is to be compensated; traditionally physicians in these circumstances have reciprocated by exchanges of coverage for each other. When physicians routinely or frequently substitute for each other in providing hospital visits to registered bed patients in active treatment hospitals, e.g. weekend coverage or daily rounds by various members of a group, the most responsible physician may claim for all the visits.

28. **Concurrent Care:** applies when the family physician remains the most responsible physician but because of the seriousness or complexity of the condition, requests continued directive care by a consultant. The family physician may claim on a per visit basis and the consultant may also claim on a per visit basis not to exceed four such claims during the first week of concurrent care and not to exceed two such claims each week thereafter while the patient's condition remains serious - this arrangement being agreeable to both physicians.
29. **Multidisciplinary Care:** applies when the complexity of the medical condition requires the services of several physicians in different disciplines. In such cases, each physician should render a separate account on a per visit basis. This does not refer to a situation where a single benefit for a team of physicians is listed in this Schedule.
30. **Supportive Care:** is the care rendered in hospital by the referring physician, who is not actively treating the case (e.g. writing orders), to a patient under the care of another physician, at the desire of the patient or family, for purposes of liaison or reassurance. The physician may claim for this care on a per visit basis not to exceed four such claims during the first week of supportive care (determined by the date of the first supportive care visit) and not to exceed two such claims each week thereafter. If medical complications develop or are present in the post-operative period which require active management by the referring physician, hospital medical care fees should be applied not supportive post-operative fees.
31. **Terminal Care (In Hospital):** applies to one designated physician responsible for the care of a terminally ill patient suffering from malignant disease. Terminal care will be deemed to start when there is no aggressive treatment of the underlying disease process and care is directed to maintaining the comfort of the patient until death occurs. Terminal care should be claimed retroactively after death on the basis of visits actually rendered for a period not to exceed four weeks prior to death. Terminal care visit fees as described above do not apply when unexpected death occurs after prolonged hospitalization for another diagnosis unrelated to the cause of death. Visits to patients in hospital may be claimed at \$13.40 (C882) by general and family practitioners and at \$14.50 (C982) by specialists. For patients receiving terminal care in chronic hospitals, the above fees should be claimed with codes W882 and W982 respectively.
32. **Independent Consideration - "I.C.":** Independent consideration may be given where a set fee is not listed in the Fee Schedule. Claims rendered under this heading should contain an explanation of the fee claimed. It is helpful to the Medical Consultant if claims for I.C. include an operative or consultation report and a comparison of the scope and difficulty of the procedure with other procedures in the Schedule.
33. **Specialist:** A specialist shall be defined (for purposes of application in the case of any given service within this Schedule) as one who holds a certificate from The Royal College of Physicians and Surgeons of Canada in the specialty which normally is considered to encompass the service in question.
A specialist rendering services outside of his specialty should use the codes and tariffs listed in the General Practice section of the Schedule.
34. **Differential Benefits:**
 - (a) Procedural fees apply to any physician rendering the services regardless of specialty.
 - (b) Specialists providing primary care in a general practice setting shall claim the appropriate visit fees (as defined in the Preamble) listed under the heading Family Practice and Practice in General. Certain other non specialist services such as counselling and interviews are under the same heading for the use of any physician providing such services.
 - (c) Specialists in paediatrics who practice allergy may claim specialist fees for their allergy services regardless of the age of their patients.
35. **Referring Physician's Services:**
 - (a) For the services rendered prior to the operation, the referring physician should claim on a fee-for-service basis, for example:
 - (i) Visits as rendered.
 - (ii) In addition to (i) above, in acute cases if detained, he may claim detention fees if appropriate. See para. 45 p.xv.
 - (b) (i) For services rendered as an assistant during the operation, the referring physician should claim an assistant's fee.

PREAMBLE

- (ii) In cases in which the referring physician is required to be present in the interest of the patient but does not actually assist at the surgical procedure, he should claim on a hospital visit basis for this service.
- (c) For the services rendered after the operation, the referring physician may claim on the basis of supportive care fees as outlined in the schedule.

36. Assistants' Services:

- (a) The assistants' fees are determined by adding the listed basic units and time units and multiplying the total number of units by \$8.22. For all cases commencing after 5:00 p.m. and before midnight or on Saturdays, Sundays and Holidays, increase the total assistant's fee by 40% (E400B). For all cases commencing after midnight and before 7:00 a.m. any night of the week, increase the total assistant's fee by 50% (E401B).
- (b) When a physician is required to make a special visit to the hospital to assist at surgery, he may charge a special visit premium of \$27.70 (C998B) for a case commencing after 5:00 p.m. and before midnight or on Saturdays, Sundays and Holidays or \$41.50 (C999B) for a case commencing after midnight and before 7:00 a.m. any night of the week. These premiums are in addition to the E400 and E401 premiums but apply only to the first patient treated on each special visit.
- (c) The time units are computed by allowing one unit (\$8.22) for each 15 minutes or part thereof of time (up to two hours) spent by the assistant. When assisting for more than two hours per case, time units for periods in excess of two hours are computed by allowing two units for each 15 minutes or part thereof. Time for purposes of these calculations includes scrub time and time spent in the operating room. If claims are being made in coded form (see explanatory comments at front of Fee Schedule), the suffix B should be added to the fee code for the procedure. The basic units should be listed separately from the time units on the claim card.
- (d) When multiple or bilateral surgical procedures are done during the same anaesthetic, the assistant's benefit shall be based on the basic units for the major procedure plus time. When bilateral procedures or surgical revisions are carried out at separate times with separate anaesthetics, the assistant shall be entitled to receive a full assistant's benefit for each procedure.
- (e) In surgical procedures requiring more than one assistant, the second assistant shall compute his fee on the same basis as the first assistant. Each claim for second assistant should be accompanied by a statement from the operating surgeon confirming the necessity for his/her services.
- (f) When a surgeon requires an assistant at a procedure for which no assistant's fee is listed, the assistant may calculate his fee by taking the number of basic units used by the anaesthetist, adding his time units and multiplying the total number of units by \$8.22.
- (g) When assistants at surgery claim for procedures for which no assistants' fees have actually been listed in the schedule, the assistants should support their claims with a statement of explanation from the surgeon, confirming the medical necessity for their attendance.

Note: Code M400B to be used by OHIP for services performed by an assistant where no assistant units are listed. All such services must be assessed for appropriateness by the OHIP Medical Consultant.

- (h) Where the attendance of a physician is requested by the patient's other medical attendants for the sole purpose of monitoring or special supportive care, and when the physician is in constant attendance, the fee shall be 3 units plus time (E003B).
- (i) When an anaesthetic has begun and the operation is cancelled prior to commencement of surgery, the assistant who has scrubbed but is not required to do more, should claim 3 basic units plus time units (E006B). If the operation is cancelled after surgery has commenced, the procedural basic units plus time units will apply. If the procedure is cancelled prior to the induction of anaesthesia and the assistant is scrubbed, a subsequent hospital visit only may be claimed.

37. Anaesthetists' Services:

- (a) The tariff is for all types of anaesthesia. The fee is for professional services, including pre-anaesthetic evaluation and post-anaesthetic follow-up and all immediate supportive measures, and does not include the cost of materials used.
- (b) If an anaesthetist is requested by another physician to see a patient in consultation (see para. 1(a)) because of the complexity, obscurity or seriousness of the case prior to the administration of an anaesthetic, he may claim a consultation fee as well as the anaesthetic fee. If this consultation is provided less than 36 hours prior to the administration of an anaesthetic, this consultation should be claimed at \$55.10 under fee code E015. The routine pre-anaesthetic evaluation of the patient required by the Public Hospitals Act does not qualify as a consultation, regardless of where and when this evaluation is performed. Anaesthetic consultations do not apply when hospital, departmental by-laws, statutes or policies require automatic consultations on any patient requiring anaesthesia.
- (c) If an anaesthetist examines a patient prior to surgery and the surgery is cancelled prior to the induction of anaesthesia, he or she may claim a hospital visit fee for this service. When an anaesthetic has begun and the operation is cancelled due to a complication prior to the commencement of surgery, the anaesthetist should claim 4 basic units plus time (E006C). If the operation is cancelled after surgery has commenced, the procedural basic fee plus time units will apply.

*For laboratory and other investigation performed in conjunction with a consultation or visit, see Diagnostic and Therapeutic Procedures and Laboratory Medicine.

PREAMBLE

- (d) The anaesthetist's fees are determined by adding the basic and time units together and multiplying the sum by \$9.48. For cases commencing after 5:00 p.m. and before midnight or on Saturdays, Sundays and Holidays, increase the total anaesthetic fee by 40% (E400C). For cases commencing after midnight and before 7:00 a.m., any night of the week, increase the total anaesthetic fee by 50% (E401C).
- (e) When an anaesthetist is required to make a special visit to the hospital to administer an anaesthetic, he may claim a special visit premium of \$27.70 (C998C) for a case commencing after 5:00 p.m. and before midnight or on Saturdays, Sundays and Holidays or \$41.50 (C999C) for a case commencing after midnight and before 7:00 a.m. any night of the week. These premiums are in addition to the E400 and E401 premiums but only apply to the first patient treated on each special visit.
- (f) When an anaesthetist administers an anaesthetic to a patient under the age of one (E009) or over the age of seventy (E007), add one unit to the total fee. When an anaesthetist administers an anaesthetic to a patient of any age with an incapacitating systemic disease that is a constant threat to life or to a moribund patient who is not expected to survive for 24 hours with or without the operation, add one unit to the total fee (E008).
- (g) Basic units are listed for most procedures and include the value of all anaesthetic services except the actual time spent administering the anaesthesia, any modifying factors, or unusual detention with the patient (see paragraph n).
- (h) Except during maintenance of continuous conduction anaesthesia time units are computed by allowing one unit for each 15 minutes or part thereof of anaesthesia time (up to two hours); following the first two hours of anaesthesia, time units for periods in excess of two hours shall be computed on the basis of two units for each 15 minutes or part thereof; time units for periods in excess of eight hours shall be computed on the basis of three units for each 15 minutes or part thereof. Anaesthesia time begins when the anaesthetist is first in attendance with the patient for the purposes of creating the anaesthetic state and ends when he is no longer in personal attendance (when the patient may be safely placed under customary post-operative supervision).
- (i) If claims are being made in coded form (see explanatory comments at front of Fee Schedule), the suffix C should be added to the fee code for the procedure.
- (j) In special cases when the anaesthetic services of more than one anaesthetist are deemed necessary in the interest of the patient, the second anaesthetist shall charge 4 basic units (E001) plus time units for the time spent assisting the first anaesthetist.
- (k) When multiple or bilateral surgical procedures are done during the same anaesthetic, the anaesthetic benefit shall be based upon the basic units for the major procedure plus time. When bilateral procedures or surgical revisions are carried out at separate times with separate anaesthetics, the anaesthetist shall be entitled to receive a full anaesthetic fee for each procedure.
- (l) In procedures where no value is listed, or with I.C., the basic portion of the calculated value will be the same as listed for a comparable procedure considering the region and modifying conditions or techniques.
- (m) When a pump with or without an oxygenator and with or without hypothermia is employed in conjunction with an anaesthetic, the anaesthetic "Basic Units" will be 28 units; this replaces the listed basic units for the procedure.
- (n) Controlled hypotension may be billed for (10 units) when it is carried out in association with anaesthesia using any technique to deliberately lower and maintain the mean blood pressure by at least 25%. Incidental hypotension from the use of any anaesthetic agent does not constitute controlled hypotension. The additional 10 units may be claimed under E004C.
- (o) When unusual detention with the patient before or after anaesthesia is essential for the safety and welfare of such patient, the necessary time will be valued on the same basis as indicated for the anaesthetic time.
- (p) For detention not associated with anaesthesia detention rates and criteria (see paragraph B.45).
- (q) When the attendance of the anaesthetist is requested by the patient's other medical attendants for the purpose of monitoring or special supportive care, and when the anaesthetist is in constant attendance, the benefit shall be 3 units plus time. The code is E003C.
- (r) Introduction of a catheter for continuous conduction analgesia and anaesthesia in obstetrics has a basic value of 6 units. Maintenance and/or supervision may be claimed at one unit for each half hour of maintenance to a maximum of 5 units. No fee is chargeable for the first hour following introduction of the catheter and first dose. Time units for delivery may be claimed at one unit per quarter hour.
- (s) When a physician administers an anaesthetic and/or other medication prior to, or during a procedure(s) or immediately after a procedure which he/she performs on the same patient, he/she should claim for the procedure(s) only. However, when a physician administers a pudendal, femoral, intercostal, sciatic, ilioinguinal, iliohypogastric, ulnar, median, or radial block in addition to performing a procedure, he may claim \$12.20 (G224) in addition to the procedure.
- (t) When hypothermia is used by the anaesthetist in procedures not specifically identified as requiring hypothermia, the basic value is 25 units. This basic value replaces the basic value listed in the Schedule for the procedure. When the basic value claimed is 25 units, the anaesthetic service may be claimed under code E002C.

PREAMBLE

- (u) When a patient is known to have malignant hyperthermia or there is a strong suspicion of susceptibility, and the anaesthetic requires full malignant hyperthermia set up and management, add 5 units to the anaesthetic claim (E012). This add-on does not apply to Z245 on page 75.
 - (v) Anaesthetic management for the emergency relief of acute upper airway (above the carina) obstruction (excluding choanal atresia) - basic 10 units (E013).
 - (w) When one anaesthetist starts a procedure and is replaced by another part way through a surgical procedure or delivery, the first anaesthetist should charge the appropriate basic fee plus time units and the second anaesthetist should charge for time units only. The second anaesthetist should use code E005C for such time units except in the case of continuous conduction anaesthesia; for which P015 (plus E100C) applies (see para. 37(r)). E002C, E003C, E004C, E005C qualify for the premiums E400C or E401C only if the case originally started within the time stated under para. 37(d) above.
Each anaesthetist should state on his/her claim card which part of the anaesthetic is being claimed and the time begun and completed.
 - (x) General anaesthesia for the purposes of this Fee Schedule includes all forms of anaesthesia except local infiltration.
 - (y) Maintenance/Supervision of epidural catheter for relief of pain (G247) see p.63. For visits rendered after 5 p.m. and before midnight or on Saturdays, Sundays and Holidays add 30% (E402). For visits after midnight but before 7 a.m. add 50% (E403).
38. **General Listings:** include the basic listings for consultations, assessments and other visits wherever they are rendered, except for non-emergency services to hospital or long-term care institution in-patients and for care rendered by a physician on duty in the emergency department. These latter services are listed separately in the Schedule.
39. **Non-Emergency Hospital in-Patient Services:** include the fee listings for consultations and other visits rendered to registered bed patients on a non-emergency basis.
- (a) When a patient has not been seen previously by the physician in charge, the first visit after admission may be claimed as a consultation or general or specific assessment. When the patient has been previously attended before admission, the first visit after admission may be claimed as a general re-assessment or specific re-assessment (depending on the specialty) if the patient has been seen before in the same illness. However when a patient is admitted to hospital by one physician and is subsequently transferred to another physician, only one general or specific assessment or re-assessment may be claimed per patient admission.
 - (b) Subsequent routine visits should be claimed as subsequent visits (minor assessments). Payments for hospital visits are usually limited to one per patient per day prior to the weekly and monthly limitations that apply after the patient has been hospitalized for 5 weeks, (6 weeks for paediatricians). However, it is not the intent of the Fee Schedule that visit fees be claimed for every day a patient is in hospital unless a physician actually visits the patient each day. For acute illnesses or exacerbation of original illness requiring hospital visits after 5 weeks of hospitalization, claims for extra visits should be made on an independent consideration basis (C121).
 - (c) When a patient in hospital is referred by one physician to another, the second physician should not be limited by the "Subsequent Hospital Visit" formula for the number of hospital visits already rendered by the first physician. In other words, the second physician is entitled to claim for his visits up to 5 weeks just as if the patient was being attended to in hospital for the first time. If the patient is transferred to the care of another physician, the "Subsequent Hospital Visit" formula would apply just as it would if only one physician was involved in the care.
 - (d) When a physician is already in the hospital and is asked to assess one of his own in-patients on a non emergency or emergency basis, the subsequent hospital visit listings apply. However if he is asked to assess another physician's patient on an emergency basis, the General Listings apply.
40. **Emergency Department - Physician on Duty Services:** include the fee listings for minor and multiple systems assessments and re-assessments during regular and premium hours rendered by the physician on duty. Any physician on duty in the emergency department should claim these fees regardless of his/her specialty.
- The listings under the heading "Emergency Department - Physician on Duty" are meant to apply to those circumstances wherein either emergency or other physicians have elected or are required to be physically and continuously present in the Emergency Department or environs for an arranged designated period of time. In addition to applying to full or part time emergency room physicians who work pre-arranged shifts, these listings also apply to the services rendered by physicians who provide on-call emergency room coverage for designated periods of time and limit the services they provide, in the community served by the hospital, predominantly to emergency room coverage. When special visits are rendered by such physicians, A and K codes may be charged for the first patient seen:
- (a) for up to a maximum of two special visits after 8:00 a.m. and up to 5:00 p.m.;
 - (b) for up to a maximum of three special visits after 5:00 p.m. and up to midnight;
 - (c) for the number of special visits rendered after midnight and up to 8:00 a.m..

When an on call physician practising in the area elects to be continuously present in the Emergency Department or environs for an arranged designated period of time because the volume of patients requires it, e.g. during a busy holiday period, the fees under Emergency Department - Physician on Duty (H101, H103, H104, etc.) should be charged after the patients responsible for the initial special visit have been examined and/or treated (and charged for under the A and K codes).

PREAMBLE

When an emergency physician is required to make a special visit to the Emergency Department prior to or after his regular arranged designated period of time on duty, he may charge the appropriate fee under the General Listings plus the applicable special visit premium for the first patient assessed; all subsequent patients assessed during this visit to the hospital should be billed under the Emergency Department - Physician on Duty listings.

When a physician is on duty in the Emergency Department, sees a patient and admits the patient to hospital, this physician may claim a minor or multiple systems assessment depending on the service initially provided. Either the patient's attending physician or the emergency department physician (but not both) may render and claim the hospital admission assessment. If the emergency department physician (instead of the attending physician) provides the admission general assessment, he may claim a general re-assessment (C004) as well as the initial assessment provided both services are actually rendered separately.

SPECIAL VISIT TO EMERGENCY OR O.P.D.

Consultation:

1. Consultation, patient not admitted:
The benefit for the consultation (or repeat consultation) plus the appropriate special visit surcharge (K99-) may be claimed.
2. Consultation, patient admitted:
 - (a) The benefit for the consultation (or repeat consultation) plus the appropriate special visit surcharge (K99-) followed by hospital visits (if rendered) may be claimed. However, if the consultant also is the "most responsible physician", he may not also claim a hospital in-patient consultation, repeat consultation, general or specific assessment, general or specific re-assessment since the initial consultation rendered in the emergency department serves as the admission assessment.
 - (b) If the consultant is not also the most responsible physician, the latter may claim the appropriate admission assessment.

Assessment:

1. Assessment, patient not admitted -
The benefit for the assessment (or re-assessment) plus the appropriate special visit surcharge (K99-) may be claimed.
2. General/specific assessment plus patient admission -
The benefit for the general or specific assessment plus the appropriate special visit surcharge (K99-) followed by hospital visits may be claimed. However, the admitting physician may not also claim a hospital in-patient general/specific assessment or reassessment since the initial general/specific assessment rendered in the emergency department serves as the admission.
3. Minor/intermediate assessment plus patient admission -
The benefit for the minor or intermediate assessment plus the appropriate special visit surcharge (K99-) may be claimed. In addition, the admitting physician may claim for a hospital in-patient general or specific reassessment if rendered.

Procedure:

Except for procedures for which the listed benefits specifically include the associated consultation or other assessment, claims may be made for both the procedure and the assessment.

Note:

If a physician has an office in the hospital and is called to assess a patient in the Emergency Department or O.P.D., the special visit premiums do not apply.

41. Emergency Department Equivalent:

An Emergency Department Equivalent is an office or other place (other than a hospital emergency department) in which a physician renders services as part of an emergency service being made available to the community.

"Emergency Department Equivalent" includes a place used by a physician to render services exclusively to the office practice patients of one or more physicians outside the office hours of those physicians if the place is open for patients to attend.

A place is an Emergency Department Equivalent only during the period of time that the emergency service is being made available.

A place may be an Emergency Department Equivalent notwithstanding that the physicians rendering services therein are not continuously present and only attend on call.

A physician may add a premium of 30% (E030) to the appropriate General Listings for services provided in an Emergency Department Equivalent if

PREAMBLE

- 1) the services were rendered on a Saturday, Sunday or holiday ("holiday" is defined in paragraph B.43(c) below);
- 2) the services were rendered on the day they were first requested; and,
- 3) the services were rendered for the purpose of dealing with an emergency.

42. Long-Term Institutional Care: See paragraph B. 14.

Premiums:

43. Special Visit Fees Applicable in Addition to Fees for Services Listed Under Consultations and Visits, Critical Care and Injections or Infusions (pages 1-18, 54, 58).

(a) A special visit is one initiated by a patient or his representative where the physician is required to travel from one location to another to see the patient.

Subject to paragraphs (b) to (r), the appropriate special visit fee applies when a physician makes a special visit to his office even if the office is in the physician's home, or to the patient's home or other location (hotel, motel, roadside, ski slope, etc.), or to the Emergency Department, O.P.D., hospital or long-term care institution from a location outside any premises of, or operated by or on behalf of, the hospital or institution.

(b) A special visit may also involve an emergency call with sacrifice of office hours. The benefits for this type of special visit apply in a situation where the demands of the patient and/or the physician's interpretation of the patient's condition is such that the physician responds immediately and makes a special visit at the sacrifice of regular office hours.

(c) A special visit at night or on a Saturday, Sunday or holiday may be claimed when non-elective or emergent calls are made by the physician between 5:00 p.m. and 7:00 a.m. or are received and made on Saturdays, Sundays and Holidays. Holidays are defined for the purpose of this Schedule as New Year's Day, Good Friday, Easter Monday, Victoria Day, Canada Day, Civic Holiday, Labour Day, Thanksgiving, Remembrance Day, Christmas Day and Boxing Day. If any of these holidays fall on a Saturday or Sunday, the Friday before or Monday following will be recognized as the holiday.

(d) Only one special visit (daytime; emergency call with sacrifice of office hours; or nights, Saturdays, Sundays and Holidays) may be claimed for the same patient, same visit. Special visits only apply to non-elective or emergent calls and do not apply to non-referred or transferred obstetrics. Special visits do not apply to visits on regular rounds to registered bed patients nor do they apply to admission assessments of patients who have been admitted to hospital on an elective basis, regardless of the time performed.

(e) An elective home visit is a visit to a patient's home deemed medically necessary by the physician, initiated by the physician or the patient and carried out at any time convenient to the physician. Physicians providing such services should charge in addition to the appropriate fee under the heading General Listings, the premiums under paragraph 43(j) only, even if the elective visits are rendered at Night, on Saturdays, Sundays and Holidays.

If an institution has arranged to have quarters in the same or in a proximal building in order that a physician will be available to make visits to the institution, particularly at night, these are not considered to be "special visits" to the institution.

If a physician is called to pronounce a patient dead, a minor assessment may be claimed along with the appropriate surcharge for the special visit.

(f) When additional patients are assessed during special visits, the "additional patient" premiums are not normally applicable unless the additional patient himself qualifies for a special visit. However, extra patients seen during a home visit while the physician is there rendering a special visit to another patient also qualify for the "additional patient" premiums if an assessment is rendered. The maximum number of special visit premiums per special visit (to any location) is ten. Patients who drop in to the office while the physician is there for reasons other than rendering a special visit do not qualify for any of the special visit premiums. Extra in-patients seen during a special visit to a hospital or other institution do not qualify for the "additional patient" premiums unless the physician has been asked specifically to see these extra patients as well.

(g) No special visit fee is chargeable in respect of services rendered in a place, other than a hospital, long term care facility that is open for patients to attend.

No special visit fee is chargeable for services rendered at any time in an Emergency Department Equivalent (see paragraph B.41 above), whether or not the services qualified for the Emergency Department Equivalent premium.

(h) When no consultation or visits may be claimed e.g. for post-op hospital visits by operating surgeon, the minimum premiums for special visits apply for additional patients seen during a special visit. Minimum premiums also apply to additional patients seen requiring Critical Care (excluding services to a critically ill patient where team fees apply), Injections or Infusions.

(i) K992, C992, K993, C993 are also applicable to assistant and/or anaesthetist at non-elective surgery.

45. Detention: may be charged when a physician is required to spend considerable extra time in active treatment of the patient (and to the exclusion of all other work). Claims for detention must be substantiated by an explanation on the claim card or in an accompanying letter, and should be made on an "I.C." basis according to the following guidelines:
After 20 minutes if the physician spends more than this amount of time providing a minor, partial or intermediate assessment or subsequent hospital visit;
After 40 minutes if the physician spends more than this amount of time providing a specific or general re-assessment or multiple systems assessment;
After 1 hour if the physician spends more than this amount of time providing a consultation, repeat consultation, specific or general assessment, multi systems assessment.
Detention is not meant to apply to procedural items or obstetrics and does not include time waiting for x-rays, lab reports or for the operating room.

Note: K101 is not applicable to attendance in a vehicle other than an Ambulance.
47. When the foregoing procedures commence after midnight and before 7:00 a.m. any night during the week, increase the procedural fee(s) by 50% (E410).
These premiums are not chargeable in addition to the obstetrical fee(s) if labour is induced by medical and/or surgical means by the same physician unless the reason for the induction is fetal distress, diabetes, premature rupture of membrane, severe pre-eclampsia - hypertension or abruption. However a forewater A.R.M. or oxytocin augmentation of labour carried out on a patient in desultory labour does not constitute induction. Major Invasive Procedures are considered to be the following:

G211	G266	G275	G288	G294	G323	G330	G349	G412	R843	R853

E409 or E410 may not be claimed for procedures which mainly involve the interpretation of test results and are not applicable to assessments or consultations. Neither are they applicable to procedures listed in the Diagnostic Radiology, Nuclear Medicine or Diagnostic Ultrasound sections of the Schedule.

PREAMBLE

48. **Non Elective Diagnostic Radiology, Laboratory Medicine, Nuclear Medicine or Diagnostic Ultrasound Examinations:** - when a physician providing the foregoing services makes a special visit to see a patient in consultation, perform a procedure or conclude that a procedure is not medically indicated, between 5:00 p.m. to midnight or on Saturdays, Sundays and Holidays, a \$27.70 premium (C109) should be claimed in addition to the appropriate consultation fee or procedural fee or by itself if the decision is made not to perform the procedure. For such services rendered between midnight and 7:00 a.m., the premium is \$41.50 (C110).
49. **Anaesthetists' Services:** - for all cases commencing after 5:00 p.m. and before midnight or on Saturdays, Sundays and Holidays, increase the total anaesthetic fee by 40% (E400C). For all cases commencing after midnight and before 7:00 a.m., any night during the week, increase the total anaesthetic fee by 50% (E401C). For cases requiring a special visit to the hospital, an additional premium of \$27.70 (C998C) during the 40% premium period and \$41.50 (C999C) during the 50% premium period may be charged to the first patient treated on each special visit.
50. **Assistants' Services:** - for all cases commencing after 5:00 p.m. and before midnight or on Saturdays, Sundays and Holidays, increase the total assistant's fee by 40% (E400B). For cases requiring a special visit to the hospital, an additional premium of \$27.70 (C998B) during the 40% premium period and \$41.50 (C999B) during the 50% premium period may be charged to the first patient treated on each special visit.
51. **Travelling Time:** may be charged directly to patients (since it is a non-insured service) when special visits are made by physicians to see patients outside their normal area of practice. Travelling time may be charged at the same rate as detention.
52. **A Locum Tenens**
- (a) Must replace the employing physician, who must be absent from the practice.

APPENDIX C

BENEFITS OUTSIDE ONTARIO

Under Code R991 payment will be made at the usual and customary fee paid by insurers in the place where the service was rendered, provided that all of the following conditions are met:

- 1) the insured service is a surgical or other complex medical procedure (excluding consultations and assessments);
- 2) the procedure is generally accepted within Ontario as medical treatment for the insured person's condition;
- 3) the procedure is not performed in Ontario;
- 4) the insured person is referred by a physician in Ontario to the physician outside Ontario who will perform the procedure;
- 5) the insured person departs from Ontario for the express purpose of having the procedure performed;
- 6) prior written approval has been obtained from the Plan.

X/X

APPENDIX D

1. Surgery to alleviate significant physical symptoms that are refractory to medical treatment that has been actively undertaken for at least a six month period, or to restore or improve function to any area altered by disease, trauma or congenital deformity normally is a benefit under the Ontario Health Insurance Plan. Surgery solely to alter or restore appearance is not a benefit of OHIP except under the circumstances as listed in the following policy.
2. Emotional, psychological or psychiatric grounds are not considered sufficient reason for OHIP coverage of surgery for alteration of appearance except under exceptional circumstances.
3. On request of the attending physician, exceptions may be made on an independent consideration basis if the proposed surgery is to alter a significant defect in appearance caused by disease, trauma or congenital deformity, and if the surgery is
 - recommended by a Mental Health Facility (as designated by The Mental Hospitals Act) or equivalent, or
 - performed on a patient who is less than 18 years of age and the defect is in the area of the body which normally and usually would not be clothed, or
 - recommended by a Correctional Institution (tattoo removal only), or
 - essential in order to obtain employment as documented by the attending physician and either by a Canada Manpower Employment Centre or by an employer with regard to a specific job, (tattoo removal only).
4. In establishing this policy, it has been recognized that
 - peer acceptance in our society often is influenced disproportionately by the facies,
 - children are especially susceptible to emotional trauma caused by physical appearances.
5. Surgery to revise or remove features of physical appearance which are familial in nature is not a benefit of OHIP.
6. Within the context of this policy, the word "disease" does not include the normal sequelae of aging. Surgery to alter changes in appearances caused by aging is not a benefit of OHIP.
7. Within the context of this policy, the word "trauma" includes trauma due to treatment such as surgery, radiation, etc.
8. The phrase "reasonable period of convalescence" should be considered as two years. Independent consideration will be given to the questionable cases.
9. Authorization from OHIP is not required for all surgery to alter appearance. It is required only for those categories of procedures for which some cases may not be a benefit under OHIP policy.
10. Suitable documentation may be requested by OHIP in some cases before authorization can be considered.
11. The treatment of acute medical or surgical complications resulting from surgery for alteration of appearance and/or function is a benefit of the Plan whether or not the original surgery was covered by OHIP. No authorization is required.
12. Revision of surgery for alteration of appearance, because of undesirable results, is a benefit of the Plan if the original surgery was a benefit and if the revision either is part of a pre-planned staged process or occurs within a reasonable period of convalescence. OHIP authorization is required only if the original surgical procedure, if it had been carried out at the time of the proposed revision, would have required such authorization.

Surface Pathology

1. Trauma Scars

(a) Neck or Face

- Includes ears and non-hair bearing areas of the scalp.
- Repair of all such scars is a benefit of OHIP, except for scars resulting from previous surgery to alter appearance that was not originally a benefit of OHIP.
- Repair procedures will depend upon the lesion but may include excision, revision, dermabrasion, etc. Rhytidectomy procedures for cosmetic reasons, however, are not a benefit of OHIP.
- OHIP authorization for repair of such scars is not required but manual assessment of the claims will be necessary to ensure that the most appropriate procedure codes are used.

(b) Scars in other Anatomical Areas

- Repair of scars which interfere with function or which are significantly symptomatic (pain, ulceration, etc.) is a benefit of OHIP.
- Scars with no significant symptoms or functional interference
 - (i) Repair is a benefit if such a repair is part of a pre-planned post-traumatic (including post-surgical) staged process. OHIP notification must be included as part of the planning process.
 - (ii) Other post-traumatic scar revision is not a benefit of OHIP.
- OHIP authorization is required for all scar repair procedures in areas other than the face or neck. Scar revision codes should be used (R026-R029).

2. Keloids

(a) Head or Neck

- The repair of all such keloids is a benefit of OHIP.

X X

APPENDIX D

- Repair procedures may include excision, injection, dermabrasion or planing.
- No OHIP authorization is required.
- (b) Excision of keloids in other areas
 - Not a benefit of OHIP unless significantly symptomatic (pain, ulceration, etc.) or there is functional impairment.
 - OHIP authorization is required.
- 3. Tattoos
 - (a) Face or Neck
 - Excision or destruction of all such tattoos is a benefit of OHIP.
 - Authorization is not required but adjudication of repair procedures will be identical to that for scars in these areas.
 - (b) Other Anatomical Areas
 - Excision or destruction of concentration camp or P.O.W. tattoos is a benefit of OHIP. Otherwise, not a benefit of OHIP except as described in Para D-3 (Page xx).
- 4. Benign lesions such as naevi, keratoses, spider naevi, papillomata, neurofibromata
 - (a) Face or Neck
 - Excision or destruction of these lesions is a benefit of OHIP.
 - Authorization is not required.
 - (b) Other Anatomical Areas
 - Normally not a benefit of OHIP if removed for alteration of appearance only, rather than for medical necessity or because of clinical suspicion or evidence of malignancy.
 - Removal of very large lesions that would be considered disfiguring in patients of any age may be a benefit of OHIP.
 - Authorization is required.
- 5. Hair Loss
 - (a) Head or Neck
 - (i) Patients less than 18 years of age
 - Repair is a benefit for non-hereditary etiologies.
 - Authorization is not required. However, if it is possible that a planned staged procedure will extend beyond the age limit, pre-authorization should be obtained, since it will be necessary after the 18th birthday.
 - (ii) Post-traumatic
 - Repair to the area of traumatic hair loss is a benefit of OHIP only if carried out within a reasonable period of convalescence. (See Para. 7, page xxiv).
 - OHIP authorization is required.
 - ▲ Usual repair procedures may include skin shifts of flaps, skin grafts, or hair plugs.
 - (iii) Other Etiology
 - Not a benefit of OHIP.
 - (b) Other Anatomical Areas
 - Not a benefit of OHIP.
- 6. Epilation of Hair
 - (a) Face
 - This procedure is a benefit of OHIP only for those patients with documented endocrine abnormality or drug-induced hirsutism.
 - (b) OHIP authorization is required.
 - (c) Other Anatomical Areas - Not a benefit of OHIP.
- 7. Redundant Skin
 - (a) Excision of redundant skin for elimination of wrinkles, etc. is not a benefit of OHIP.
 - (b) Blepharoplasty is not a benefit of OHIP unless there is documented evidence of medical necessity from the appropriate physician such as visual field defect caused by the redundant eyelid skin. OHIP authorization is required. (Include documentation of visual fields).

Sub-surface Pathology

1. Congenital deformities

- (a) Head or Neck
 - Repair is a benefit of OHIP except for:
 - surgery to revise or remove features which are familial in nature or do not interfere with function
 - surgery to correct "outstanding ears" in patients who are eighteen years of age or over.
 - OHIP authorization is required.
- (b) Other Anatomical Areas
 - Normally not a benefit of OHIP if surgery is for alteration of appearance only.

2. Post-Traumatic Deformities

- Reconstructive procedures are a benefit at the acute stage; within two years, or if part of a pre-planned staged process of repair.
- Repair of procedures may include bone revision, tissue shifts and grafts, prosthesis implantation, etc.
- OHIP authorization is required for repairs beyond the acute stage.

XXI

APPENDIX D

3. Deformities resulting from local disease (such as loss or distortion of bone, muscle, connective tissue, adipose tissue, etc.)
 - (a) Head or Neck
 - Reconstructive procedure for significant abnormalities are a benefit at the acute stage; during a chronic disease process; within a reasonable period of convalescence (see Para. 7, Page xxiv) or if part of a planned staged process of repair initiated during one of these periods.
 - Repair procedures normally could include tissue grafts, flaps or shifts, bone revision, prosthesis insertion, etc.
 - Face lifts, modified face lifts, brow lifts, etc., are not a benefit of the Plan if skin only is involved in the procedure. However, a repair such as ptosis repair or face lift with underlying slings is a benefit of OHIP if the procedure is to correct significant deformity following stroke, cancer, VIIth nerve palsy, etc.
 - OHIP authorization is required for repair of deformities resulting from local disease.
 - (b) Other Anatomical Areas
 - Not a benefit of OHIP if the correction is for appearance only.
 - Correction of severe deformity resulting from polio or neurological disease will be considered for payment - OHIP authorization is required.
4. Breast Surgery
 - (a) Augmentation Mammoplasty
 - This procedure is a benefit of OHIP unilaterally or bilaterally for a female patient with breast aplasia.
 - It may be an OHIP benefit unilaterally for a female patient with a severely hypoplastic breast. Additional documentation may be required.
 - Unilateral augmentation mammoplasty may be a benefit of the Plan if there is gross disproportion present or in association with an approved unilateral reduction mammoplasty or postmastectomy reconstruction of the contralateral breast.
 - The correct code for the repair procedure is R112
 - OHIP authorization is required.
 - (b) Post-Mastectomy Reconstruction
 - Unilateral or bilateral breast reconstruction is a benefit of OHIP when the procedure is subsequent to total or partial mastectomy (including wedge resection) or prophylactic mastectomy as listed in the Schedule of Benefits.
 - Authorization is not required.
 - (c) Reduction Mammoplasty
 - Reduction Mammoplasty may be approved where there is significant associated symptomatology. Ptosis and/or size are not sufficient grounds for OHIP coverage of reduction mammoplasty.
 - Unilateral Reduction Mammoplasty may be a benefit of the Plan if there is gross disproportion present or in association with approved unilateral augmentation mammoplasty, or post mastectomy reconstruction of the contralateral breast. Additional documentation may be required.
 - OHIP authorization is required.
 - (d) Mastectomy
 - This procedure is a benefit of the Plan.
 - Authorization is not required.
 - (e) Accessory Breasts or accessory nipples
 - Excision of such accessory tissue is a benefit of the Plan.
 - The appropriate code should be used from the Schedule listings under Skin and Subcutaneous tissue.
 - Authorization is not required.
5. Septorhinoplasty
 - This is a benefit of OHIP when the rhinoplasty component is necessary to obtain an adequate airway or following trauma within 2 years or part of a pre-planned staged plastic repair. (See Para 7, Page xxiv).
 - In cases where a septoplasty is necessary to improve function and a rhinoplasty is done to improve the cosmetic effect, OHIP will pay the part of the operation that was medically necessary (e.g. if a septorhinoplasty is performed and a septoplasty was necessary to improve the airway, OHIP will pay MD12 and the surgeon is entitled to claim the difference from the patient).
 - OHIP authorization is required. A description of the external deformity should be provided.
6. Excision of excess fatty tissue and/or skin is not a benefit of the Plan except for panniculectomy where there is significant symptomatology.
 - OHIP authorization is required.
7. Sex-Reassignment Surgery
 - (1) Sex-reassignment surgical procedures are a benefit of OHIP only if they are performed on patients who have completed the Gender Identity Clinic program operated by the Clarke Institute of Psychiatry in Toronto. Moreover, claims are accepted for payment only for those patients for whom the Clinic has recommended that surgery take place. This surgery need not take place in Toronto or even in Ontario. Surgery recommended by the Clinic which takes place outside the Province of Ontario may be approved for payment at rates in accordance with the current OHIP Schedule of Benefits.
 - (2) Within the foregoing guidelines, reconstruction of genitalia and mastectomy are benefits of the Plan. However, since the hormonal treatments associated with sex-reassignment themselves give rise to breast enlargement, augmentation mammoplasty or breast reconstruction in a male to female conversion is not a benefit of OHIP, in keeping with the previously outlined policy regarding breast surgery in females. OHIP authorization is required.

LABORATORY MEDICINE

Code

ANATOMICAL PATHOLOGY, HISTOLOGY AND CYTOLOGY (Fees for Diagnostic Interpretation of Laboratory Procedures)

Preamble

1. The following fees involve responsibilities for accessioning specimens and interpreting the diagnostic descriptions. For autopsies, this involves participation in mortality review according to the context of the hospital or community setting as well as a written report.
2. On occasion the services provided by the laboratory physician may involve substantially greater professional responsibility and expertise than is provided for in these fees. In such cases, the physician may bill for these on an independent consideration basis provided that the nature of the services and their distinguishing features are adequately described.
3. The surgical pathology fees are organized according to services requiring increasing expertise and time and are defined as follows:

Simple specimen - includes gross and, where necessary, microscopic examination and interpretation of small tissues requiring less time, effort and risk than the next category. A simple specimen will ordinarily include tissue considered by the physician to be "normal" (e.g. uterine tubes, vas deferens, hernial sac, etc.).

Small or uncomplicated specimen - includes small tissues thought to be abnormal which carry more professional risk and effort than those described in the previous category, and in which the number of slides is small. As a rule, this category would apply to a single small specimen or to two specimens if two tissues are combined on a slide (e.g. skin biopsy, endometrial biopsy).

Multiple small specimens or curettings requiring multiple slides - includes specimens requiring several slides e.g. prostate curettings, uterine curettings, multiple endoscopic gastrointestinal tract biopsies from the same segment of the G.I. tract (multiple specimens or slides).

Organ or large specimen - includes partial or entire organs with or without adjacent tissues but without complex dissection e.g. segment of stomach, uterus.

Complex small or large specimen - includes complex diagnostic biopsies in which the physician time/expertise required for dissection and interpretation is substantially above that pertaining to previous categories. This includes some biopsies of kidney, liver, muscle, lymph nodes, etc. as well as extensive biopsies such as cervix cone biopsies, organs and adjacent tissues such as local lymph nodes (up to six) etc.

Comprehensive large specimen - includes the most comprehensive and largest specimens with extensive regional dissection and/or complex diagnostic problems. Most specimens with regional node dissection would be included in this.

NUCLEAR MEDICINE - IN VIVO

Column T - is the technical benefit for the production of records, radiopharmaceutical agents, apparatus, premises, technical services, administration and secretarial services.

Column P₁ - is the professional benefit for supervision of the procedure, appropriate patient interview and/or examination, correlation of related data, interpretation of results, and provision of a written report. The physician need not be continuously present in the nuclear medicine department or private facility while the procedures are being carried out but must be physically present frequently enough to carry out the appropriate patient interview and/or examination and approve, modify or intervene in the procedures as required.

Column P₂ - is the professional benefit for interpretation of results and provision of a written report. If the physician does not meet the criteria for P₁ or has claimed any visit in conjunction with that Nuclear Medicine procedure, the lesser professional fee (P₂) will be claimed.

- Notes: 1. The total benefit is arrived at by adding T plus P₁ (first code listed, e.g. J802 or by adding T plus P₂ (second code listed, e.g. J602).
2. When coding the total benefit use suffix A; when coding technical portion only use suffix B; when coding professional portion only use suffix C.
3. If quantification or data manipulation is carried out in addition to visual inspection of imaging studies, add 30% to the appropriate professional benefit except when SPECT is claimed. For claim purposes, use prefix "Y". Such activity must add significant diagnostic information not available by inspection alone and does not include simple image enhancement techniques such as smoothing, background subtraction, etc. Recording of images on videotape for replay and production of images on the video display of a computer do not in themselves justify the additional benefit. The claims for cardiac wall motion studies and calculation of ventricular ejection fraction (J811 and J813) already include an allowance for data manipulation as a general rule and no additional benefit may be claimed. The additional computer benefit may be claimed only when additional cardiac quantifications are performed i.e. stroke volume ratio and volume response curves and/or phase analysis.
4. The total benefit is arrived at by adding T plus P₁ (first code listed e.g., J801) or by adding T plus P₂ (second code listed e.g., J601).
5. If examination of Brain, Lung, Liver or Spleen is limited to one view, the benefit (T and P₁ or P₂) is to be reduced by 50%.
6. Repeat studies on the same day may be claimed only after exercise or drug intervention.
7. The phrase "nuclear medicine specialist" should be interpreted as "nuclear medicine physician" since not all physicians practising nuclear medicine are certified as specialists in this discipline by the Royal College of Physicians and Surgeons.
8. When tomographic examination (SPECT) is billed, the 30% add on referred to in para. 1 may not be charged.

DIAGNOSTIC RADIOLOGY

Column T - The benefit for radiological examination including the production of radiographs, supplying of contrast media excluding non-ionic contrast media, apparatus, premises, technical services, administration and collection costs.

Column P - The benefit for consultation between radiologist and referring physician, fluoroscopy, interpretation of radiographs and fluoroscopic findings and supervision of x-ray services by a radiologist.

Hospital out-patient technical fees will be paid at 93.23% of the technical fee listed in this Schedule of Benefits.

Private offices and hospital out-patient departments will bill Column T plus P.

When coding the total benefit use suffix A; when coding the technical portion only use suffix B; when coding the professional portion only use suffix C.

Radiologists should use Column P as a guideline for negotiating remuneration with hospitals.

Benefits for clinical procedures related to x-ray examinations are listed in the following section, or under Diagnostic and Therapeutic or Surgical Procedures. "Clinical Procedures", in this context, are those by which contrast media are introduced, except oral or rectal administration for study of the alimentary tract, and intravenous injections, which are an integral part of the study, performed by the physician collecting the benefit for the procedure.

If less than minimum number of views are performed, reduce listed fees by 25%.

If the examinations which are requested by the referring physician yield abnormal findings or if they would yield information which in the opinion of the radiologist would be insufficient, governed by the needs of the patient and the requirements of the referring physician, the radiologist may add further views and charge for them (if listed).

Fee Schedule Interpretations

1. When a radiologist is asked to x-ray one extremity only, no additional charge should be made for comparison x-rays initiated by the radiologist.
2. Nephrotomography is covered by the listings for intravenous pyelogram and planigram.
3. A stereo pair is to be counted as two views.
4. No extra claim should be charged for rapid sequence I.V.P.
5. No additional claim is warranted for the use of the image intensifier in diagnostic radiology.
6. Fluoroscopy claims should not be submitted for any examination performed by the radiologist where fluoroscopy is generally regarded as an integral part of the examinations e.g. examinations of the G.I. tract, urinary tract, special procedures.
7. "Colon-air contrast" may be claimed when performed according to generally accepted criteria. The colon should be scrupulously prepared. Five to eight full size views of the abdomen should be obtained after fluoroscopically controlled introduction of air and barium.
8. "Oesophagus, stomach and duodenum, double contrast" presupposes the introduction of gas, the use of antifoam agent and a suitable barium mixture.
9. Abdomen and chest studies should not be routinely done and claimed in gastrointestinal examinations.
10. Three or more views of the chest should not be done routinely and claimed when a chest examination is requested.
11. Chest studies should not be routinely done and claimed in mammography cases.
12. Nasal bones or accessory nasal sinuses should not be routinely claimed in skull examination requests.
13. Abdomen and/or pelvis should not be routinely claimed in lumbar spine examination requests.
14. A survey film of the abdomen is a single view. The ordering of additional films should be left to the discretion of the radiologist who should have the power to determine what examination is adequate for a specific patient. Obviously, if progress of a long tube is being followed, a survey film is sufficient. If, however, an intestinal obstruction is being followed, a single film is usually inadequate.
15. Conventional films of the spine should not be routinely done and claimed for before myelography. The necessity of having plain film studies of the spine prior to interpreting the myelographic studies is obvious. It is not essential, however, that these be done at the institution where the myelogram was done. If they have been done at an outside office, then it is a matter for the radiologist and the referring physician to have the films available. If they cannot be made available to the radiologist, it is an acceptable practice for him to do the required examination of these areas and to claim for them so that they may be available for interpretation along with the myelographic study.
16. Pharynx and oesophagus (cine or videotape) - X106 should not be claimed routinely with X108 and X109 but only when specifically indicated.
17. Lumbar or lumbosacral spine (X028) does not include the entire sacrum. An examination of the sacrum may be carried out and claimed for only when specifically indicated.
18. X006 and X007 are not both to be routinely claimed on the same patient but only when specifically ordered.
19. A maximum of two computed tomography examinations per patient per day may be claimed.
20. Complex head CT Scans are meant to be multi planer (multi directional) head CT Scans - to include one or more of the following areas: pituitary fossa, posterior fossa, internal auditory meati, orbits and related structures, the temporal bone and its contents and the temporomandibular joints. X400, X401 and X188 are not to be billed in addition to those fees for complex head studies.
21. All benefits listed apply to unilateral examinations unless otherwise specified.
22. Claims for X-ray services, when referred by an Osteopath, Chiropractor or Chiropractor to a private X-ray facility are not benefits of OHIP.
23. Claims for X-ray services, when referred by an Osteopath or Chiropractor to a hospital out-patient department are benefits.

CLINICAL PROCEDURES, ASSOCIATED WITH
DIAGNOSTIC RADIOLOGICAL EXAMINATIONS

- Note: 1. These procedural fees are intended to cover compensation for the professional service of placing an instrument and introducing contrast media if done (except oral or rectal administration for study of the alimentary tract). Injection of materials to enhance the effect of contrast media is included in the procedure benefits.
2. Radiological charges are additional: see similar entries under DIAGNOSTIC RADIOLOGY.
3. Where similar procedures are done for diagnostic physiological studies of non-radiological nature, e.g. cardiac catheterization or intra-arterial infusion, they are listed separately under Surgery or Diagnostic and Therapeutic Procedures. See Index.

DIAGNOSTIC ULTRASOUND

T and P Columns should be interpreted in the spirit of the first two paragraphs on page 32, but without limiting the performance of these tests to suitably trained physicians of any one specialty. Furthermore, the physician must be physically available to approve, modify or intervene in the examination as required or the examination must be completely recorded by video/computer methods and reviewed in its entirety by the physician. No fee (either professional or technical) may be charged if the physician's only involvement is the interpretation of hard copy (films).

- Notes: A-Mode-implies a one-dimensional ultrasonic measurement procedure.
M-Mode-implies a one-dimensional ultrasonic measurement procedure with movement of the trace to record amplitude and velocity of moving echo-producing structures.
Scan B-Mode-implies a two-dimensional ultrasonic scanning procedure with a two-dimensional display. All ultrasound examinations include a permanent record and interpretative report.
The total benefit is arrived at by adding T plus P. When coding the total benefit use suffix A; when coding the technical portion only use suffix B; when coding the professional portion only use suffix C.

DIAGNOSTIC AND THERAPEUTIC PROCEDURES

Code With a few exceptions specifically indicated below, the listed procedural benefits are for the procedure(s) alone. Consultations or visit benefits when such services are rendered, may be claimed in addition to the procedural benefits.
When a procedure(s) is the sole reason for a visit, add \$4.05 basic fee per visit for those procedures marked (+) regardless of the number of procedures carried out during that visit. However, if the patient visit is to a physician's office or a diagnostic facility controlled directly or indirectly by a physician who has examined (or is about to examine the patient) and referred the patient to such a diagnostic facility, no basic fee should be claimed under these circumstances.

Note: G700 is not payable to a hospital department.
Fee Schedule Interpretations

- 1. Urinalysis and other laboratory tests listed on page 59, apply when these services are performed by a physician in his office with or without an associated consultation or visit. The same tests listed in the Laboratory Medicine Section of the Schedule apply to licensed laboratories.
- 2. Some fees for Diagnostic and Therapeutic Procedures have the technical and professional components listed separately. The technical component includes the salaries of support staff, equipment depreciation or lease costs, supplies and costs associated with the preparation of a written report. The professional component includes the clinical supervision of the diagnostic facility, interpretation of the test results and a written report. When only one fee is listed for a service, it represents the professional component only.
- 3. The Preamble applicable to Surgical Procedures also applies, where appropriate, to Diagnostic and Therapeutic Procedures.

ALLERGY

Note: If a patient presents for an allergy injection and has an acute infectious condition, albeit of the respiratory system, or some other unrelated condition which would have otherwise required a separate office visit, the physician is entitled to charge the appropriate assessment fee as well as the injection fee. If a patient requires a brief assessment of his allergic condition as well as the allergy injection, the physician should bill the injection and basic fees.

CRITICAL CARE - Cont'd.

Critical Care - (Intensive Care Unit) - includes provision in an Intensive Care Area of all aspects of care of a critically ill patient excluding ventilatory support and includes initial consultation and assessment, emergency resuscitation, intravenous lines, cut downs, pressure infusion set and pharmacological agents, insertion of arterial, C.V.P. or urinary catheters and nasogastric tubes, securing and interpretation of laboratory tests, oximetry, transcutaneous blood gases and intracranial pressure monitoring interpretation and assessment when indicated (excluding insertion of ICP measuring device). These fees are not chargeable for services rendered to stabilized patients in I.C.U.'s, or patients admitted for ECG monitoring or observation alone.

	<u>Physician-in-charge</u> is the physician(s) daily providing the above.	
G400	1st day	167.90
G401	2nd to 10th days (inclusive) per diem	83.90
G402	11th day onwards per diem	41.95

Ventilatory Support (Intensive Care Unit) - includes provision of ventilatory care including initial consultation and assessment of the patient, endotracheal intubation with positive pressure ventilation including intravenous lines, cutdown, pressure infusion, insertion arterial C.V.P. lines, tracheal toilet, use of artificial ventilator and all necessary measures for its supervision, obtaining and interpretation of blood gases, oximetry, transcutaneous blood gas application and assessment.

	<u>Physician-in-charge</u> is the physician(s) daily providing the above.	
G405	1st day	146.80
G406	2nd to 10th day (inclusive) per diem	73.40
G407	11th day onwards per diem	48.90

Comprehensive Care (Intensive Care Unit) - these fees apply to Intensive Care physicians who provide complete care (both Critical Care and Ventilatory Support as defined above) to Intensive Care Area patients. These fees include the initial consultation and assessment and subsequent examinations of the patient, endotracheal intubation, tracheal toilet, artificial ventilation and all necessary measures for respiratory support, emergency resuscitation, insertion of intravenous lines, cut downs, arterial and/or venous catheters, pressure infusion sets and pharmacological agents, insertion of CVP lines, defibrillation, cardioversion and usual resuscitative measures, insertion of urinary catheters and nasogastric tubes, securing and interpretation of blood gases and laboratory tests, oximetry, transcutaneous blood gases, intracranial pressure monitoring interpretation and assessment when indicated (excluding insertion of ICP measuring device). These fees are not chargeable for services rendered to stabilized patients in I.C.U.'s, or patients admitted for ECG monitoring or observation alone.

	<u>Physician-in-charge</u> is the physician(s) daily providing the above.	
G557	1st day	244.70
G558	2nd to 10th days (inclusive) per diem	122.40
G559	11th day onwards per diem	61.20

If Ventilatory Support only is provided, for example, by the anaesthetist(s), claims should then be made under Ventilatory Support. Comprehensive Care fees do not apply. Other physicians should then charge Critical Care fees or the appropriate consultation, visit or procedures.

The fees under Physician-in-Charge apply per patient treated, i.e., while the physician-in-charge may change during the course of treatment, the daily fee formula as set out should be charged by the physicians involved as if there was only one physician-in-charge during the treatment program; in this sense, the daily fees are team fees.

If patient has been discharged from Unit more than 48 hours and is re-admitted to Unit, 1st day rate applies again on day of re-admission.

The appropriate consultation, procedure and visit fees shall apply after stopping Critical Care, Ventilatory Support or Comprehensive Care. Other physicians apart from those providing Critical Care or Comprehensive Care may charge the appropriate consultation, visit and procedure fees not listed in the fee schedule for Critical Care.

These claims will be adjudicated by the Plan on an Independent Consideration basis.

OBSTETRICS

1. Obstetrical care is divided into its components. A prenatal major assessment when performed may be claimed; it shall comprise a full history, an inquiry into, and an examination of all parts or systems (and may include a detailed examination of one or more parts or systems), an appropriate record and advice to the patient. All other prenatal visits shall comprise the necessary history and inquiry, examination, appropriate record, pregnancy related counselling and advice to the patient. Normal (uncomplicated) prenatal care includes a prenatal general assessment visit, then monthly visits to 32 weeks, followed by visits every 2nd week to 36 weeks, then weekly visits until delivery. However, complicated pregnancies may require additional visits. Labour - delivery and postpartum care are listed separately.

2. If an uncomplicated obstetrical patient is transferred from one physician to another physician for obstetrical care, the appropriate assessment benefit may be charged by the second physician, followed by prenatal visits. This statement does not apply to physicians substituting for each other or when the second physician sees the patient for the first time in labour. If the obstetrical patient is referred to a consultant for obstetrical care because of the complexity, obscurity or seriousness of the case, the consultant may claim a consultation in addition to the prenatal visits.

3. Illnesses resulting from or associated with pregnancy or false labour requiring added home or hospital visits, shall be claimed on a per visit basis.

4. When a pregnant patient visits her physician for a condition unrelated to her pregnancy and apart from her routine scheduled prenatal visits, the physician may charge the appropriate visit benefit.

5. The listings under the heading Referred Services may be claimed by the consultant physician in addition to the appropriate consultation or visit benefit. They may not be claimed by physicians providing obstetrical care to their own patients.

6. If a consultant is requested by another physician to perform a surgical induction of labour, or emergency removal of a Shirodkar suture (except at delivery) assuming someone else has inserted the suture, the consultant should claim consultation benefit for this (these) service(s).

7. Medical induction or stimulation of labour may be claimed once per pregnancy by any one physician and only when carried out for a recognized obstetrical complication(s) and does not qualify for detention benefits.

8. The listings for "Attendance at labour and attendance at delivery" and for "Attendance at delivery" may not be claimed by any physician when a patient is transferred to a second physician for normal obstetrical care.

9. Ordinary immediate care of the newborn is included in the labour-delivery fee and when the service is rendered by the anaesthetist, it is included in the anaesthetic benefit. A life threatening emergency situation requiring active resuscitation of the newborn provided by any physician may be claimed under codes G521, G522, G523. When indicated, endotracheal intubation and tracheo-bronchial toilet should be billed under G211, and not at G521, G522, G523.

10. When a physician provides newborn care and also performs a circumcision on the same newborn or infant, both services may be claimed.

11. When an obstetrician routinely transfers all newborns to another physician, the latter should not claim consultation benefit for these "transferrals". If the baby is well, the physician should charge the newborn care in hospital benefit plus for attendance at maternal delivery if this service is given. If the baby is sick, the physician may claim a general assessment and for attendance at maternal delivery (if this service is given) plus daily visits for as long as his services are required. If an obstetrician normally cares for newborns himself or transfers the care of newborns to a family physician but refers a newborn to a paediatrician because of the complexity, obscurity or seriousness of the case, the latter may claim for this service according to the following guidelines:

a) If attendance at maternal delivery is provided, code H267 may be claimed and if a general assessment of the baby is carried out, code C263 may be claimed as well. However, a postnatal consultation of the baby, code C265 may not be claimed in addition to code H267.

b) If a paediatrician has not attended delivery, a postnatal consultation may be claimed (if this service is rendered) even though a prenatal consultation may already have been claimed.

12. When a physician provides prenatal visits, attends labour, assists or administers the anaesthetic at Caesarean section and visits the patient post-operatively, he is entitled to claim for prenatal visits, attendance at labour, assistant's or anaesthetist's benefits for Caesarean section and post-operative supportive care while the patient is in hospital.

13. Physicians may claim for assisted breech delivery (P020) when the service includes spontaneous delivery to the umbilicus, with extraction of the shoulders, arms and aftercoming head.

14. The Preamble applicable to Surgical Procedures (pages 73-75) also applies to obstetrics where appropriate.

15. The premiums applicable to Obstetrics are as follows: When deliveries and other obstetrical procedures done in continuity with the delivery occur after 5:00 p.m. and before midnight or on Saturdays, Sundays and Holidays, increase the procedural fee(s) by 30% (E409). When time of delivery occurs after midnight and before 7:00 a.m. any night during the week, increase the procedural fee(s) by 50% (E410). These premiums are not chargeable in addition to the obstetrical procedural fee(s) if labour is induced by medical and/or surgical means by the same physician unless the reason for the induction is fetal distress, diabetes, premature rupture of membrane, severe pre-eclampsia-hypertension or abruption. However a forewater A.R.M. or oxytocin augmentation of labour carried out on a patient in desultory labour does not constitute induction.

SURGICAL PROCEDURES

Preamble - FOR DEFINITION OF THE ROLE OF THE REFERRING PHYSICIAN, SEE REFERRING PHYSICIAN SERVICES ON PAGE ix.

- FOR DEFINITION OF THE ROLES OF THE ANAESTHETIST, SEE ANAESTHETIST SERVICES ON PAGES x and xi.
- (1) The surgical benefit (except for those procedures marked I.O.P., Complete Care and Fractures and Dislocations requiring no reduction) includes hospital visits rendered by the surgeon two days prior to surgery, the operative procedure, the post-operative care usually associated with the procedure(s) rendered by the surgeon while the patient is in hospital, and one office visit for follow up examination if necessary. If the surgeon is required to perform a procedure(s) not usually associated with the original surgical procedure, he may claim for these on a fee for service basis. If special visits to hospital are required at any time post-operatively, the surgeon may claim the special visit premiums even if the basic hospital visit fees are not chargeable (under these circumstances the hospital visits should be claimed on an N/C (no charge) basis.) The surgical benefit as noted above does not include the major pre-operative visit i.e. the consultation or assessment fee chargeable when the decision to operate is made and the operation is scheduled, regardless of the time interval between the major pre-operative visit and surgery. The hospital or day-care admission assessment (consultation, repeat consultation, general or specific assessment or re-assessment) is not a benefit to the surgeon unless it happens to be the major pre-operative visit as defined above. Hospital visits (minor assessments) may be claimed for visits rendered more than two days prior to surgery. Other visits (excluding admission assessments) prior to admission may be claimed for in addition to the surgical fee. For patients remaining in hospital because of complications, hospital visit fees may be claimed in addition to the surgical or procedural fee after eight weeks of hospitalization in the case of fractures and dislocations and after two weeks for other procedures. Because the number of hospital visits is limited to three per week after the fifth week of hospitalization and six per month after the thirteenth week of hospitalization, the starting point for calculating the number of hospital visits is based on the date of admission if the operating surgeon has admitted the patient or the date of referral if the patient has been referred to the operating surgeon while in hospital. The surgical benefit includes the generally accepted surgical components of the procedure. The listed benefit of a procedure normally includes repair of any iatrogenic complications occurring during the course of the surgery.
 - (2) When a physician makes a special trip to perform a non-elective surgical procedure during the daytime (Monday to Friday), he should claim the appropriate special visit, a consultation if the case is referred or the appropriate assessment if the case is not referred plus the procedural benefit(s). If the non-elective procedure is carried out at night (after 5:00 p.m. and before 7:00 a.m.), or Saturdays, Sundays and Holidays, the physician may claim the special visit applicable to the consultation or assessment, and the surgical premium (E409 or E410 - see paragraph 47 of the Preamble).
 - (3) When more than one procedure is carried out by a surgeon under the same anaesthesia or within 14 days during the same hospitalization for the same condition, the full benefit applies to the major procedure and 85% of the listed benefit(s) applies to the other procedure(s) performed unless otherwise stated in the Preamble(s) or Schedule. The above statement applies to staged or bilateral procedures but does not apply when a normal appendix or simple ovarian or para-ovarian cyst is removed incidentally during an operation, for which no claim should be made.
 - (4) When a subsequent operation becomes necessary for the same condition because of a complication or for a new condition, the full benefit should apply for each procedure.
 - (5) When a subsequent non-elective procedure is done for a new condition by the same surgeon, the full benefit will apply to each procedure. When a subsequent elective procedure is done for a different condition within 14 days during the same hospitalization by the same surgeon, the benefit for the lesser procedure shall be reduced by 15%.
 - (6) When different operative procedures are done by two different surgeons under the same anaesthesia for different conditions, the benefit will be 100% of the listed benefit for each condition. Under these circumstances, the basic assistants' benefit should not be charged by either operating surgeon; however time units may be claimed.
 - (7) As a general rule, when elective bilateral procedures are performed by two surgeons at the same time, one surgeon should charge for the surgical procedures and the other surgeon should claim the assistant's benefit.
 - (8) Where two surgeons are working together in surgery in which neither a team fee or other method of billing is set out in the benefit schedule, the surgeon should identify himself as the operating surgeon and claim accordingly; the surgeon who is assisting him should identify himself as such and claim the assistant's benefit. Where the second or assistant surgeon is brought into the case on a consultation basis, he may, when indicated, claim a consultation as well but should be prepared to justify it on an I.C. basis. If the nature or complexity of a procedure requires more than one operating surgeon each providing a separate service in

61

SURGICAL PROCEDURES

his own specialized field e.g. one surgeon carries out the ablative part and another surgeon the reconstructive part of the procedure, then each surgeon should claim the listed benefit for his services. This statement applies when the additional procedure(s) are not the usual components of the main procedure. If one surgeon in addition to performing a specialized portion of a procedure, acts as an assistant during the remainder of the procedure, he may also claim time units for assisting.

- (9) Unless otherwise stated, the listed benefits are for unilateral procedures only.
 - (10) When a procedure is performed, a procedural benefit, if listed, should be claimed. Substitution of consultation and/or visit benefits for procedural benefits (except as in paragraph 11), is not in keeping with the intent of the benefit schedule.
 - (11) When a surgical benefit (non I.O.P., Complete Care, Fracture or Dislocation) is less than the consultation benefit and the case is referred, the physician may claim the consultation benefit instead of the surgical benefit. However, to avoid the consultation being counted as such under the OHIP limitation rules on the number of consultations allowed per year, the physician should claim the consultation fee under the surgical procedure nomenclature or code. Since the consultation is replacing a procedural benefit which includes the pre- and post-operative and surgical care, no additional claims beyond the consultation should be made.
 - (12) If a physician performs a minor surgical procedure and during the same visit assesses and treats the patient for another completely unrelated and significant problem involving another body system, the physician should claim for the procedure as well as the appropriate assessment.
 - (13) Where a procedure is specified as "Independent Operative Procedure (I.O.P.)", the procedural benefit should be claimed in full along with the appropriate consultation or visit when both services are actually rendered. However, when an I.O.P. procedure is done in conjunction with a non-I.O.P. procedure, there should be no claim for the consultation, pre- and post-operative care related to the I.O.P. procedure. The listed I.O.P. benefit should be claimed in these circumstances along with the non-I.O.P. benefits plus the related major pre-operative visit (see paragraph (1) of Surgical Preamble). When multiple or bilateral I.O.P. procedures are performed at the same time by the same physician, the listed procedural benefits should be claimed in full but the pre- and post-operative benefits should be claimed as if only one procedure had been performed. When a patient is examined in a physician's office and this leads to an elective Independent Operative Procedure (I.O.P.) being performed for the same problem or diagnosis by the same physician in the Emergency or Outpatient Department on a non-admission basis, the physician should claim a consultation or visit for the examination in the office and the fee for the I.O.P. carried out in the Emergency Outpatient Department. An additional assessment benefit at the time of the elective I.O.P. should only be claimed when an additional assessment is performed.
 - (14) When procedures are specifically listed under Surgical Procedures, surgeons should use these listings rather than applying one of the plastic surgery listed fees under Operations on Skin and Subcutaneous Tissue.
 - (15) For excision of tumours not specifically listed in this Schedule, claims should be made on an I.C. basis (code R993). Independent consideration also will be given (under code R990) to claims for other unusual but generally accepted surgical procedures which are not listed specifically in the Schedule (excluding non-major variations of listed procedures). In submitting claims, physicians should relate the service rendered to comparable listed procedures in terms of scope and difficulty (see Preamble, Part B, paragraph 32).
 - (16) Cosmetic or Aesthetic Surgery: means a service to enhance appearance without being medically necessary such as (a) surgery for correction of facial wrinkles; (b) surgery for eyelid wrinkles (symmetrical and without a functional problem); (c) rhinoplasty for appearances only; and (d) augmentation mammoplasty for symmetrical deficiency without physiological abnormality. These services are not benefits of OHIP. (See Preamble, Appendix D).
 - (17) Reconstructive Surgery: is surgery to improve appearance and/or function to any area altered by disease, trauma or congenital deformity. Although surgery solely to restore appearance may be included in this definition under certain limited conditions, emotional, psychological or psychiatric grounds normally are not considered sufficient additional reason for OHIP coverage of such surgery. Appendix D of the Preamble to this Schedule describes the conditions under which surgery for alteration of appearance, only, may be a benefit of the Plan.
- Physicians should submit requests to their District OHIP office for authorization of any proposed surgery which may fall outside of OHIP coverage. (See Appendix D).
- (18) Procedural benefits (non I.O.P.) include the removal of sutures when both services are rendered by the same physician unless the removal of sutures is done on the second or subsequent office visit for follow up examination. When a physician is entitled to claim for removal of sutures i.e. as outlined in the previous sentence or is a physician other than the operating surgeon or following an I.O.P. procedure, an office visit may be claimed.

108

- (19) Additional claims for biopsies performed when a surgeon is operating in the abdominal or thoracic cavity should be given independent consideration.
- (20) When a listed procedure is performed and no anaesthetic is required, the procedure should be claimed under the "local anaesthetic" listing.
- (21) When a physician administers an anaesthetic and/or other medication prior to, during a procedure(s) or immediately after a procedure(s) which he/she performs on the same patient, he/she should claim for the procedure(s) only. However, when a physician administers a pudendal, femoral, intercostal, sciatic, ilioinguinal, iliohypogastric, ulnar, median or radial block in addition to performing a procedure, he may claim \$12.20 (G224) in addition to the procedure.
- (22) If claims are being submitted in coded form, the surgeon should add the suffix A to the listed procedural code, the surgical assistant should add the suffix B to the listed procedural code and the anaesthetist should add the suffix C to the listed procedural code.

Plastic Surgery Procedures:			
The setting of benefits covering the various procedures of plastic surgery is a very difficult problem. Since many procedures are divided into stages which have to be considered in assessing a fee, it is felt that all such plastic surgical procedures should be classed by the responsible specialist as very minor, major, intermediate, major, or extensive major. Benefits should be claimed according to procedures set forth in the tariff, except in cases which are difficult to define, in which case "I.C." should be the basis of the claim. The minimum benefit for each would be as follows:			
R150	Very Minor		75.70 4
R151	Minor	3	114.70 4
R152	Intermediate	4	212.60 4
R153	Major	4	318.20 5

Notes:	(1) Descriptive details of procedure (e.g.: operative report) should be submitted with claims for codes R150-R154 for professional assessment.

OPERATIONS ON THE MUSCULOSKELETAL SYSTEM

Preamble:

- (1) Corrective splints must be "corrective" to qualify for a benefit as such. The corrective splint listings are not applicable to simple immobilization such as with a Jones bandage or metal finger splint following soft tissue injury.
- (2) The removal of a wire or pin or other device when used for traction or external fixation (except for rigid external fixators) in the treatment of a fracture or other orthopaedic procedure is to be included in the procedural fee unless a general anaesthetic is required in which case a fee may be claimed. Removal of devices used for internal fixation more than 30 days after insertion may be charged for in addition to the procedural benefit.
- (3) The benefit for total hip replacement also includes denervation of the hip joint and adductor tenotomy.
- (4) The benefit for obtaining a bone graft is not to be claimed in cases of pseudarthrosis repair, fusions or for listings in which bone grafting is included.
- (5) For the supervision of limb fitting and 6 months post-operative care following amputation, claim visit fees. Amputation with immediate fitting to include supervision of final limb fitting - add 40% (E586).
- (6) Arthroscopic surgery shall constitute an arthrotomy for the purposes of this schedule and procedures shall command the same benefits.

Fractures and Dislocations:

- (a) For fractures or dislocations requiring open or closed reduction or no reduction, the major pre-operative visit i.e. consultation or appropriate assessment may be claimed in addition to the listed benefits.
- (b) OPEN REDUCTION shall mean the treatment of a fracture or dislocation by either closed intramedullary fixation or by an operative procedure to expose the fracture. The benefits include fixation by internal or external devices.
- (c) CLOSED REDUCTION shall mean the reduction of a fracture or dislocation by non-operative methods (including traction).
- (d) NO REDUCTION shall mean the treatment of a fracture or dislocation by any other method and includes the use of the initial external support.
- (e) The stated benefit covers full or after treatment up to 6 weeks except if additional reductions are necessary or if patient is transferred to another surgeon or if the patient is paraplegic.
- (f) In multiple fractures or dislocations, the benefit for the major fracture or dislocation shall be 100% and the benefit for the other fractures or dislocations 85%. When no procedural benefit is applicable, but when that fracture or dislocation necessitates hospitalization or concurrent care over that demanded by the major injury, a visit benefit may be claimed in addition to other procedural benefits.
- (g) For repeat reductions (closed or open) for the same fracture or dislocation, the full benefit should be claimed for the final reduction and after care - previous reductions by the same surgeon should be claimed at 85%.
- (h) Emergency splinting of fractures in the emergency department should be on the basis of appropriate visit benefit, plus application of cast if appropriate.
- (i) Transferred cases -
 - (1) When patients are transferred to a chronic or convalescent facility, additional visit benefits on a chronic care basis shall be allowed to other than the operating surgeon (and also to the surgeon after 6 weeks).
 - (2) When patients are transferred to another physician for after care of fractures and dislocations treated by closed or no reduction, the physician rendering the initial care should claim 75% of the listed fee and the surgeon rendering subsequent care visit fees except where otherwise specified. In cases involving open reduction, the percentage should be 80% for the surgeon providing the initial care.
 - (3) In cases where the original physician attempts to reduce a fracture or dislocation under general anaesthesia, is unsuccessful and refers the patient to another physician for definitive care, the original physician should claim 75% of the listed fee.
- (j) Paraplegia associated with fractures and dislocations may be claimed by charging visit fees after the first 2 weeks of post-operative care in addition to the appropriate procedural fees.
- (k) Pseudarthrosis may be allowed as the appropriate benefit after the fracture is 4 months old.
- (l) For fractures and dislocations not requiring reduction, visit fees apply unless a specific fee is listed. If the listed fee is less than the consultation, the consultation should be claimed under the fracture/dislocation code number.
